## Fortnightly Major Economic Indicators: 01-15 April 2025

**Broad money** increased by 4.02 percent during July-March FY25 and stood at BDT 21,15,042.70 crore at the end of March 2025 compared to 2.65 percent increase during July-March FY24. This increase mainly stemmed from the increase in net domestic assets (NDA) during the period.

**Domestic credit** increased by 5.11 percent during July-March FY25 and stood at BDT 22,23,603.50 crore at the end of March 2025 compared to 5.69 percent increase during July-March FY24. The increase in domestic credit has been driven by the increase in both credit to the public sector and credit to the private sector. Credit to the public sector increased by 6.28 percent during July-March FY25 and stood at BDT 5,04,091.20 crore at the end of March 2025 compared to 1.25 percent increase during July-March FY24. The positive credit growth in the public sector emerged from both net credit to govt. sector and credit to other public sector.

**Credit to the private sector** increased by 4.77 percent during July-March FY25 and stood at BDT 17,19,512.30 crore at the end of March 2025 compared to 6.98 percent increase during July-March FY24.

**Bank deposits** increased by 4.35 percent during July-March FY25 and stood at BDT 18,18,611.10 crore at the end of March 2025 compared to 5.06 percent increase during July-March FY24. The increase in bank deposits emerged from the increase in time deposits during the period.

**Reserve money** decreased by 10.57 percent during 01 July-15 April FY25 and stood at BDT 3,69,920.80 crore as on 15 April 2025 compared to the end of June 2024. Reserve money decreased due to decrease in both Net Foreign Assets (NFA) and Net Domestic Assets (NDA) of Bangladesh Bank under review.

**Government borrowing from the banking system** increased by BDT 42,558.49 crore during 01 July-15 April FY25 against the increase of BDT 46,485.98 crore during 01 July-15 April FY24<sup>Ⓟ</sup>.

**NBR tax revenue** collection slightly increased by 2.76 percent and stood at BDT 2,56,486.84 crore during July-March FY25 compared to BDT 2,49,592.31 crore during July-March FY24. The target for NBR tax revenue collection was set at BDT 4,80,000.00 crore in the budget for FY25. NBR tax revenue collection during July-March FY25 was 53.43 percent of the target set for FY25.

**Exports<sup>Ⓜ</sup>** increased by 10.52 percent to USD 37.19 billion during July-March FY25 compared to 5.35 percent decrease during the same period of the preceding fiscal year. Exports increased mainly due to increase in manufactured products exports during the period. As per latest available data, exports increased by 9.77 percent to USD 40.22 billion during July-April FY25.

**Custom-based imports** increased by 6.38 percent to USD 52.36 billion during July-March FY25 compared to 15.54 percent decrease during the same period of the previous fiscal year. Besides, opening of import LC increased by 4.79 percent as well as settlement of import LC increased by 5.28 percent during July-March FY25. Import monitoring relaxation by BB might have contributed to the positive growth of import during the reported period.

**Inward Remittances** increased by 28.46 percent to USD 23.26 billion during 01 July-15 April FY25 compared to 6.53 percent increase during the same period of the previous fiscal year. The consistent inflow of remittances can be linked to the interim government's initiatives aimed at persuading remitters to use formal banking channels instead of informal channels like hundi.

**Current account balance** recorded a deficit of USD 0.66 billion during July-March FY25 against the deficit of USD 4.40 billion during July-March FY24. The deficit in the current account balance emerged from the deficit in trade balance, services and primary income.

**Foreign exchange reserves** stood at USD 26.52 billion as on 15 April 2025 from USD 25.49 billion as on 15 April 2024. After a long period the foreign exchange reserves has just started increasing. The consistent flow of higher remittances during a couple of months, increasing of exports as well as the reduction of imports might have contributed to the increase in foreign exchange reserves.

**Headline Inflation (point-to-point)** slightly increased to 9.35 percent in March 2025 from 9.32 percent in February 2025. On the other hand, **headline inflation (twelve-month average)** slightly eased down to 10.26 percent in March 2025 from 10.30 percent in February 2025. Decrease in headline inflation (twelve-month average) can be attributed to a reduction in food inflation due to decrease of vegetable price. On the other hand point to point inflation has shown an upward trend due to a rise in non-food items. Additionally, the effects of contractionary policies are expected to further influence inflationary pressures in near future. As per latest available data, headline Inflation (point-to-point) went down to 9.17 percent in April 2025 from 9.35 percent in March 2025. Besides, headline inflation (twelve-month average) also slightly eased down to 10.21 percent in April 2025 from 10.26 percent in March 2025.
