However, balances of government deposits and other funds are net out from the banking system borrowing. On the other hand, government borrowing from non-banking domestic sources includes savings instruments introduced by the Directorate of National Savings (NSD) and government T-bills and T-bonds held by non-bank financial institutions, insurance companies, individual investors, etc.

Government domestic borrowing from the banking system slightly increased during July-January of FY24 compared to the borrowing of the preceding year, caused by higher repayments of previous debt to the banking system. On the other hand, non-bank borrowing (net) followed slower growth during the same period of FY24 owing to the reduction in net sales of National Savings Certificates (NSCs).

³ Including Islamic branches and windows of conventional banks.
