Introduction

Islamic banking is a financial system that promotes finance according to Islamic Shariah law. The elimination of Riba makes Islamic banking system unique and widely acceptable especially among the Muslims. The Islamic banking system is mainly based on Quranic norms and Sunnah. In this system, the risk as well as returns on investment is equally shared between the stakeholders.

The Islamic finance industry has established substantially over the last ten years. Conventional banks are also now opening Islamic branches and windows taking into account public demand. At present, besides conventional banking services, seventeen conventional commercial banks are providing Islamic banking services through forty nine Islamic banking branches and twelve conventional commercial banks are providing Islamic banking services through six-hundred and thirty two Islamic banking windows. Nine conventional commercial banks are providing Islamic banking services through both branch and window (Table 1).

With a view to conducting banking business in accordance with Islamic Shariah Islamic banking services are introduced in all Muslim countries throughout the world. The journey of Islamic banking in Bangladesh began in 1983 with establishment of Islami Bank Bangladesh PLC. Later on, in 1987, the second Islamic bank of the country, Al Baraka Bank Ltd was established. However, in 1996, two more banks, Al-arafah Islami Bank PLC and Social Investment Bank Limited (At present Social Islami Bank PLC) were given clearance to operate under the Islamic banking principles. In July 2001, another bank namely Shahjalal Islami bank PLC began its operations. Subsequently, two traditional banks namely EXIM Bank PLC and First Security Bank (At present First Security Islami Bank PLC) were converted to Islamic bank, and EXIM bank started operations as full-fledged Islamic bank in 2004. After some time the fourth generation bank Union Bank PLC started its journey as an Islamic bank in Bangladesh on 07 March 2013. NRB Global Bank was converted into an Islamic bank in March 2021 and at present it is known as Global Islami Bank PLC. Then in March 2022, another conventional bank, Standard Bank PLC, was transformed into an Islamic bank. Currently, ten full-fledged Islamic banks are operating in Bangladesh.

Besides Islamic Banks, Islamic NBFCs industry is also expanding through opening Islamic branches and windows taking into account public demand. At present, among thirty five NBFCs, two NBFCs are operating as full-fledged Islamic NBFC, one conventional NBFC is providing Islamic NBFC services through seven Islamic NBFC branches including four windows and seven conventional NBFC are providing Islamic NBFC services through sixty nine Islamic NBFC windows (Table-14)

In order for conducting NBFCs business in accordance with Islamic Shariah, Islamic NBFCs services are introduced in most of the Muslim countries throughout the world. The journey of Islamic NBFCs in Bangladesh began in 2001 with the establishment of Islamic Finance and Investment Ltd. Later on, in 2007, the second Islamic NBFC of the country, Hajj Finance Company Limited was established. Later on, seven NBFCs have launched their Islamic NBFCs services through opening branches and windows.

In Bangladesh, the extent of Islamic banking services is increasing rapidly like other Muslim countries of the world. Islamic banks/NBFCs governed by Islamic Sharia'h are running in parallel with conventional banks/NBFCs. In Islamic banking Riba is used to refer to interest. According to Islamic Law interest is prohibited, that is why Riba is prohibited in Islamic banking. Based upon this idea Islamic banking is running.

As several Islamic banks are operating in the banking sector of Bangladesh, Statistics Department of Bangladesh Bank took necessary initiatives and issued a circular [STD Circular No-2, Date: 06-02-2022] instructing all banks who are offering Islamic banking services to report data on Islamic banking in a prescribed format. Likewise data collection from Islamic banks, Statistics Department of Bangladesh Bank also took necessary initiatives and issued a circular [STD Circular No-01, Date: 15-01-2025] instructing all NBFCs who are offering Islamic NBFCs services to report data on Islamic financing in a prescribed format.

It is necessary to disseminate the statistics of different indicators related to Islamic banking to public, researchers, educationist & policy makers so that they may aware of Islamic banking practices in Bangladesh or they can conduct further research or policy makers can formulate policies if requires.

This report tries to find the trend of major indicators of Islamic banks as well as Islamic NBFCs in Bangladesh in order to give readers a preliminary idea about the current Islamic banking and finance practices in the country. In the Executive Summary portion, the trend and nature of growth of different indicators have been discussed. In Statistical Tables & Charts portion detailed data on the indicators are furnished. Finally based on the findings of the analysis this report is ended with some concluding remarks.

Executive Summary

Overview

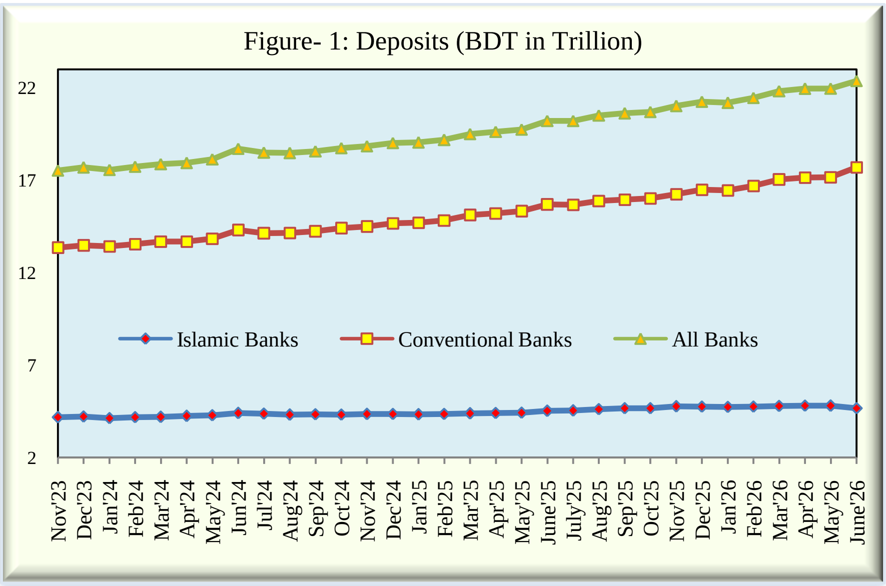
This portion of the report provides a descriptive analysis of some of the indicators of both **Islamic and Conventional banking** in Bangladesh aiming at measuring performance of them from November 2023 to June 2026. The study focuses on key banking activities such as deposits, investments, assets, exports, imports, and workers' remittances in order to examine trend and nature of growth over the period under study. However, the data unveils differential growth patterns within the two sectors. The findings of the study reveal that conventional banks outperformed Islamic banks in most cases.

This portion of the report also depicts trend of some indicators such as deposits, investments and assets of both **Islamic and Conventional NBFCs** in Bangladesh. The main objective of this analysis is just to give the readers a preliminary idea about the aforementioned indicators of the NBFCs in Bangladesh.

1. For Islamic Banks

1.1 Deposits

The banking sector in Bangladesh experienced an upward trend of deposits from November 2023 to June 2026 (Fig-1). Total deposits increased from BDT 17.54 trillion in November 2023 to BDT 22.39 trillion in June 2026, reflecting gradual expansion of the sector. Conventional banks consistently dominated deposit mobilization, contributing the largest share (79.13%) during the reference month. In contrast Islamic banks, despite their small share (20.87%), demonstrated steady and moderate growth.

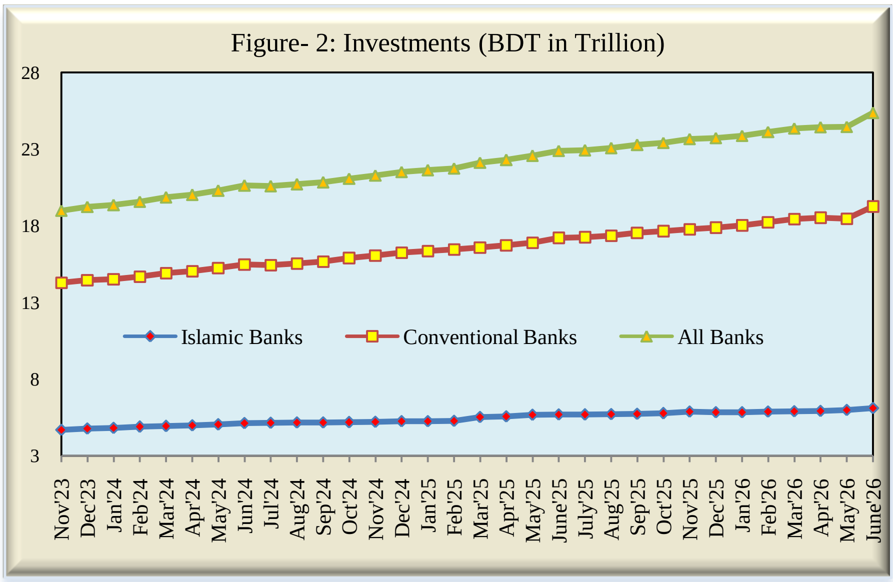


Conventional banks, deposits stood at BDT 17.71 trillion in June 2026, up from BDT 17.17 trillion in May 2026, reflecting a month-on-month growth of about 3.18%. On a year-on-year basis, deposits rose from BDT 15.69 trillion in June 2025 to BDT 17.71 trillion in June 2026, registering a growth of approximately 12.87%. This steady growth in deposits of conventional banks can be primarily attributed to unstable situation in Islamic banking sector after July 2024 uprising, which sifted the reliability and confidence of depositors more in conventional banking.

Focusing on Islamic banks, deposits remained approximately at BDT 4.67 trillion in June 2026, decreasing from BDT 4.80 trillion in May 2026, indicating decreasing rate at 2.68%. But on a year-on-year basis, deposits raised from BDT 4.52 trillion in June 2025 to BDT 4.67 trillion in June 2026 which demonstrates a moderate growth of around 3.31%. This year-on-year growth indicates a gradual shift in depositor's preference toward Islamic Banking. Aftermath of July uprising, Bangladesh Bank's surveillance for Islamic banks in terms of liquidity support, identification of weakness of the banks, recruitment of administrators to improve management capacity of the banks etc may facilitate them to regain depositors' confidence. The study also finds that depositors continue to rely predominantly on Mudaraba-based deposits, which make up about 86.87% of Islamic banks deposit base. As of June 2026**,** Islamic banks' deposit base is overwhelmingly driven by the private sector, which accounts for about 90.19% of total deposits (Tables 5 and 6).

1.2 Investments

The investment trend in Bangladesh's banking sector demonstrated sustained growth during the period from November 2023 to June 2026. Total investments increased from BDT 18.99 trillion in November 2023 to BDT 25.37 trillion in June 2026, registering a considerable growth of 33.56%. Whereas, conventional banks accounted for the dominant share (75.89%) of total investments during the reference month and Islamic banks maintained a comparatively smaller (24.11%) yet a stable contribution.

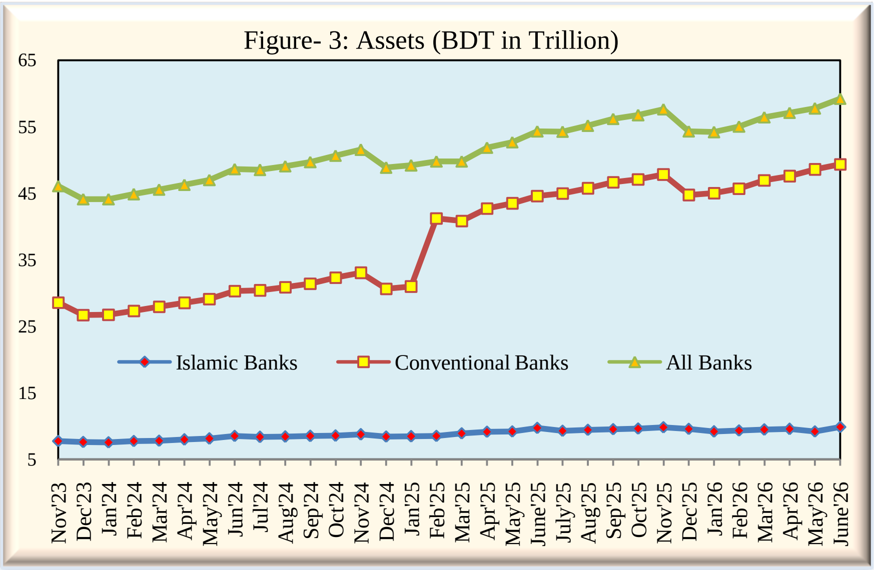


In conventional banks, investments stood at BDT19.25 trillion in June 2026, increasing from BDT 18.48 trillion in May 2026, indicating a month-on-month increase of about 4.20%. On a year-on-year basis, investments increased from BDT 17.21 trillion in June 2025 to BDT 19.25 trillion in June 2026, marking a growth of 11.88%. Both of these growths suggest a cautious lending and investment strategies of conventional banks focusing on macroeconomic challenges, including inflationary pressures, exchange rate volatility, and tighter regulatory oversight in Bangladesh (Fig. 2; Table 3).

Focusing on Islamic banks, investments stood at BDT 6.12 trillion in June 2026 increase from BDT 5.99 trillion in May 2026, with month-on-month growth of 2.06%. On a year-on-year basis, investments increased by from BDT 5.70 trillion in June 2025 to BDT 6.12 trillion in June 2026, reflecting a growth of approximately 7.37%. The moderate monthly increase reflects a prudent investment strategy, while the year-on-year growth indicates gradual expansion, driven by rising demand for Islamic financing products, particularly profit-and-loss sharing modes. It is also observed that a large share of financing was concentrated in Bai-Murabaha (41.57%), HPSM (18.64%) and Bai-Muajjal (16.87%) showing dependence on a few key financing structures. From a sectoral perspective, Islamic banks' investments were allocated across various segments of the economy, with the highest concentration in industry and trade & commerce, underscoring their importance in driving productive and commercial economic activities (Tables 7, 8 and 9).

1.3 Assets

In Bangladesh, the assets position of banking sector has exhibited a sustained upward trend in assets growth over the period from November 2023 to June 2026. Total assets increased significantly from BDT 46.09 trillion in November 2023 to BDT 59.23 trillion in June 2026, representing an overall growth of 28.50%**.** Although minor fluctuations were observed, particularly in December 2024 and December 2025, the general trajectory remained positive. This consistent growth indicates strong assets mobilization capacity and reflects the sector's resilience in the face of potential economic and political uncertainties (Fig-3).

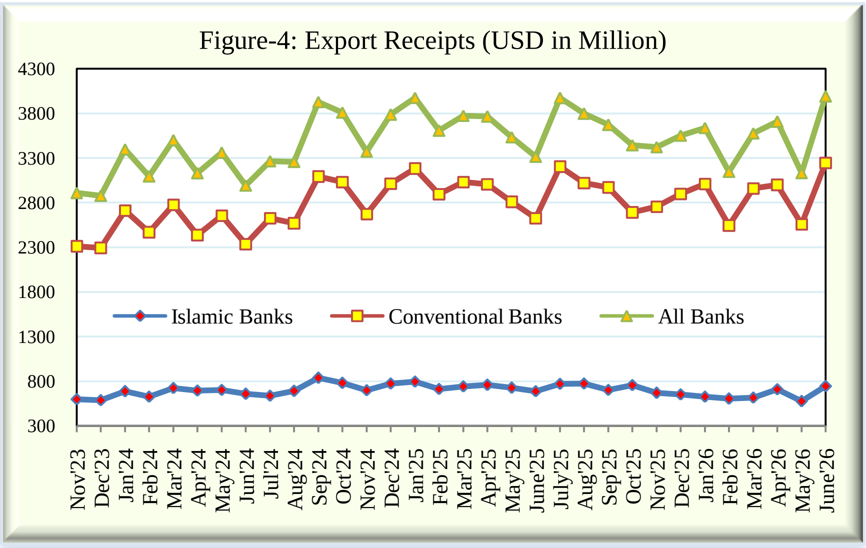


In Case conventional banks recorded stronger and more dynamic assets growth throughout the same period. Total assets stood at BDT 49.35 trillion in June 2026, increasing slightly from BDT 48.56 trillion in May 2026, indicating a month-on-month growth of about 1.63%. On a year-on-year basis, assets rose from BDT 44.58 trillion in June 2025 to BDT 49.35 trillion in June 2026, reflecting a moderate growth of approximately 10.70%. This steady month-on-month increase indicates assets revaluation, loan repayments exceeding new disbursements, and tighter regulatory or liquidity conditions of conventional banks in Bangladesh. However, non-performing loans (NPLs), high cost of funds, and prevailing macroeconomic pressure including inflation and exchange rate volatility have also affected the conventional banks to take a cautious stance which reflects on their year-on-year growth.

Concerning Islamic banks, total assets at BDT 9.88 trillion in June 2026 compared to BDT 9.19 trillion in May 2026, indicating month-on-month increase of about 7.43%. On a year-on-year basis, assets rose from BDT 9.74 trillion in June 2025 to BDT 9.88 trillion in June 2026, reflecting an increase of 1.42%. The steady year-on-year increase, along with the more pronounced monthly amplification, indicates that Islamic banks experienced a relatively stable but subdued asset position during the period. This performance may reflect higher expansion in financing activities, cautious investment strategies, and persistent liquidity management. Although demand for Shariah-compliant financial services remains positive, limited operational scale, a relatively narrow range of financial products and ongoing challenges in the banking sector may have constrained asset growth in the short term.

1.4 Export Receipts

Banking system of Bangladesh has been playing an important role through receiving export earnings on behalf of the exporters. The export performance of Bangladesh's banking sector exhibits moderate fluctuations with an overall stable trend during the period from November 2023 to June 2026. Total export receipts ranged between USD 2909 million in November 2023 and USD 3992 million in June 2026, indicating an overall growth of 37.24% but a range-bound movement without sustained long-term growth over this period (Fig-4). The highest export earnings were recorded USD 3992 million in June 2026, closely followed by USD 3977 million in January 2025, reflecting strong external demand and improved trade performance during those periods. In contrast, the lowest export level was observed in USD 2880 million in December 2023, suggesting weaker export activity. By June 2026, exports increased to USD 3992 million, indicating a moderate expanding situation compared to the peak levels of 2025.



In case conventional banks consistently held a dominant share (81.39%) of total export-financing and proceeds handling during the reference month. Their export volumes recorded USD 3249 million in June 2026, increasing from USD 2560 million in May 2026, indicates a month-on-month increasing at 26.94%. On a year-on-year basis, export receipts USD 3249 million in June 2026, increasing from USD 2629 million in June 2025, reflecting an increase rate of approximately 23.60%. However, export receipts increased by USD 690 million in June 2026 from previous month indicates an increase external demand and domestic supply side supports during the month.

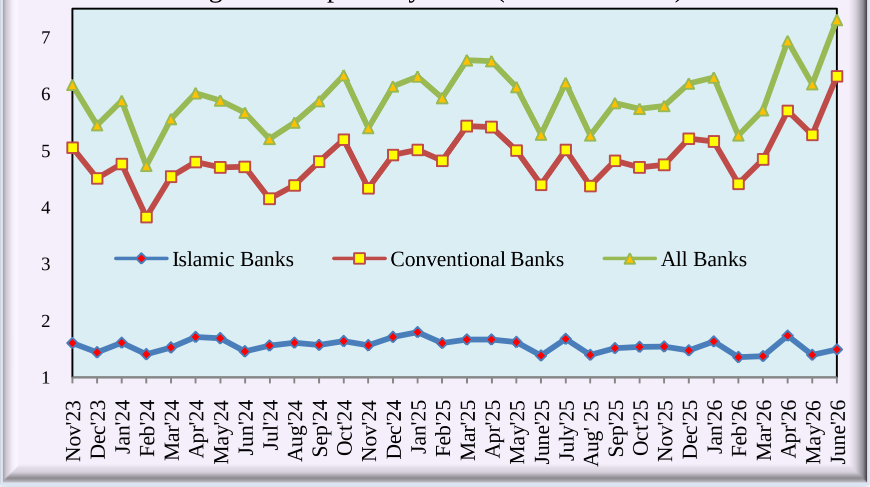
Concerning Islamic banks contributed a smaller yet consistent share (18.61%) of export earnings. Month-on-month comparison Islamic banks export receipts USD 743 million in June 2026 and USD 575 million in May 2026, indicates a month-on-month increasing at 29.25%. On a year-on-year basis, export receipts USD 743 million in June 2026, increasing from USD 688 million in June 2025, reflecting an increase rate of 8.01%. However, export performance moderated thereafter, with a gradual decline observed in late 2025 and early 2026, falling to USD 575 million in May 2026. Islamic banks consistently handled around 17% to 22% of total export proceeds, remaining stable share.

Both Conventional and Islamic banks show a downward adjustment toward early 2026 and increasing after month, indicating positive export momentum. From the above analysis, it can be said that as the majority of country's export proceeds were received by the conventional banks over the period under study, Islamic banks may take necessary initiatives to improve the quality of this service offered by them so that they could capture more market share in receiving export earnings of the banking sector (Fig-4, Table-3).

1.5 Import Payments

The import performance of Bangladesh's banking sector shows noticeable monthly fluctuations during the period from November 2023 to June 2026. Despite short-term volatility, the general movement reflects a moderately stable import pattern with occasional peaks and slowdowns. The highest import payments was recorded USD 6801 million in June 2026, indicating strong import demand during this month. In contrast, the lowest level was observed USD 4228 million in February 2024. Toward early 2026, imports declined but it enlarges to USD 6801 million in June 2026. Overall, imports show a fluctuating but upward trend, without sustained long-term expansion.

Figure-5: Import Payments (USD in Billion)

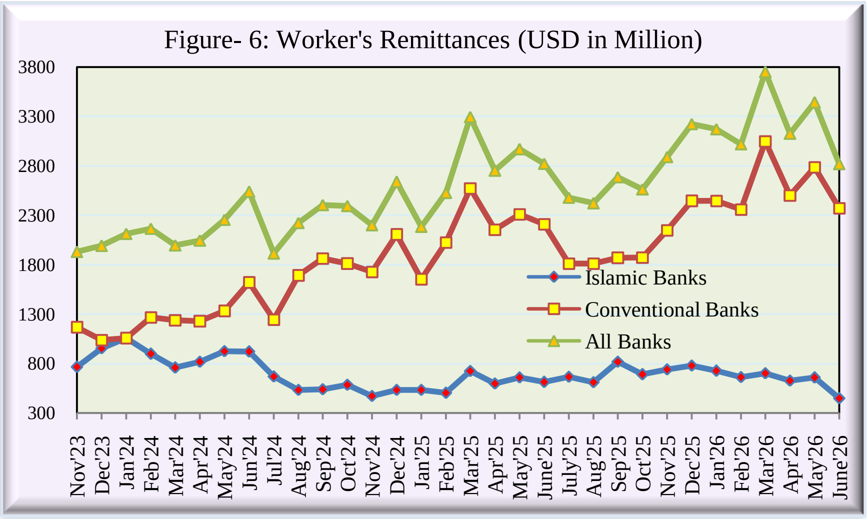


In Conventional banks import payments was USD 5810 million in June 2026, increasing from USD 4776 million in May 2026, indicating a month-on-month increase of about 21.65%**.** On a year-on-year basis, import payments was USD 5810 million in June 2026 increased from USD 3898 million in June 2025, marking a increase rate at 49.04%. The robust year-on-year increase indicates an outperformance by conventional banks or resumption of private investment in the economy which encourages business investment in capital machinery and raw materials although having economic uncertainty arisen from middle east war crisis.(Fig-5)

Focusing on Islamic banks Import payments stood at USD 991 million in June 2026 increased from USD 894 million in May 2026, as a month-on-month comparison it's reflected by the increasing rate at 10.85%. On a year-on-year basis, import payments was USD 991 million in June 2026 increased from USD 883 million in June 2025, marking a increase rate at 12.29%. The Islamic banking imports are relatively stable and observed increased value in the latest period.

1.6 Worker’s Remittances

From figure 6 it can be seen that during the period November 2023 to June 2026, worker's remittances through all banks in USD decreased in June 2026 to USD 2819 million. While both Islamic and conventional banks contributed to the inflows, conventional banks consistently handled a larger share, with their dominance becoming more pronounced after the first few months of the period.



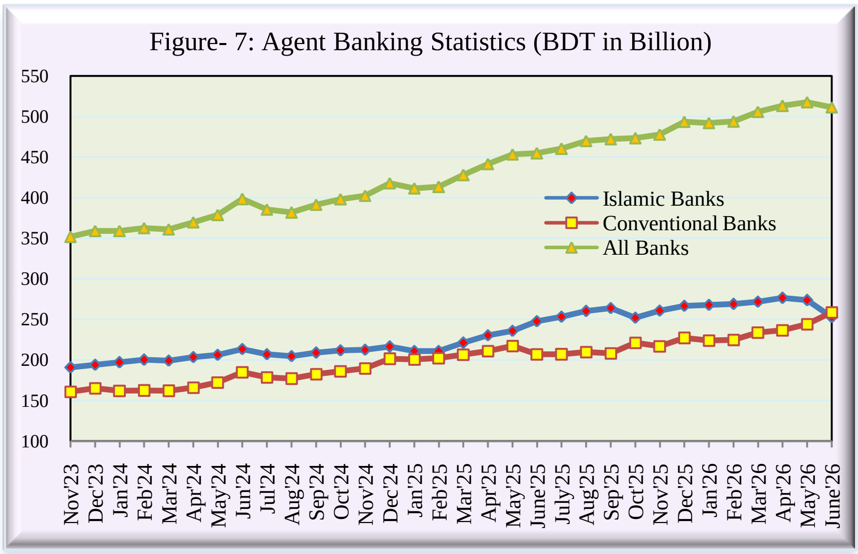
In Conventional banks month-on-month comparison worker’s remittance was USD 2371 million in June 2026 decreased from USD 2786 in May 2026, decreasing at 14.88%. Whereas in year-on-year basis, worker’s remittance was USD 2371 million in June 2026 increased from USD 2211 million in June 2025, marking a moderate growth at 7.25%. In month-on-month comparison Islamic banks worker’s remittances decreased from USD 657 million in May 2026 to USD 448 million at the end of June 2026, indicating 31.82% decreasing rate. Whereas on year-on-year comparison Islamic banks faced remittances decrease from USD 612 million in June 2025 to USD 448 million at the end of June 2026, reflecting a 26.77% decrease.

Despite Islamic banks’ early-year performance, their inability to retain their share in worker remittances helps conventional banks’ worker’s remittances to grow. However recent experience in losing market share by Islamic banks highlights unstable situation of Islamic banking sector. As workers' remittances receipts play a vital role in building the base for foreign currency reserve of a bank which ultimately assists in settling foreign currency transactions, Islamic banks may go for sufficient reforms as regard to the factors which influences depositors’ confidence in Islamic banks. The month-on-month decrease in worker’s remittance during June 2026 may be due to the exceptionally high remittance inflow recorded in May 2026 ahead of Eid-ul-Azha. Additionally, geopolitical uncertainties in Middle East, including the Iran crisis may also have affect on remittance inflow patterns.(Fig.6, Table-3).

1.7 Agent Banking Deposits

Line diagram for agent banking deposits for all banks in figure 7 describes that agent banking deposits is gradually increasing over the period November 2023 to June 2026 (Fig-7). This indicator of agent banking reflects that agent banking is gaining popularity day by day in Bangladesh. Total agent banking deposits increased from BDT 352 billion in November 2023 to BDT 511 billion in June 2026, reflecting gradual expansion of the sector with 45.38% growth rate.

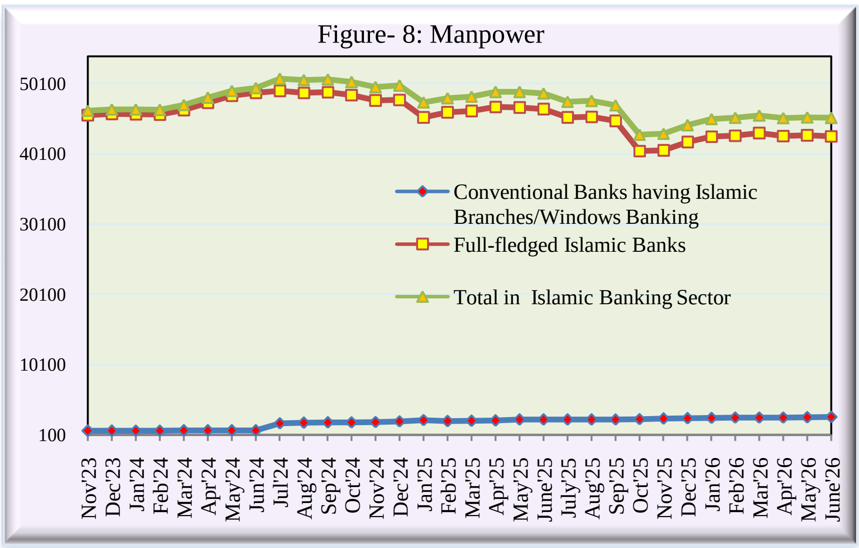
In case of conventional banks, agent banking deposits stood at BDT 259 billion in June 2026, increasing from BDT 244 billion in May 2026, indicating a month-on-month increasing of about 6.01%. On a year-on-year basis, deposits rose from BDT 207 billion in June 2025 to BDT 259 billion in June 2026, registering a growth of approximately 24.99%. Agent banking deposits of conventional banks experienced a steady trend and it contributed 50.60% of total agent banking deposits share in the banking arena. Focusing on Islamic banks, agent banking deposits recorded approximately at BDT 253 billion in June 2026, decreasing from BDT 273 billion in May 2026, with 7.64% decreasing rate. However, on a year-on-year basis, agent banking deposits increased from BDT 248 billion in June 2025 to BDT 253 billion in June 2026, reflecting a growth of around 1.99%. The data indicates that in June 2026, Islamic banks accounted for holding 49.40% of the total deposits in agent banking arena.



The data reveals that both the segments of the banking sector achieved robust growth in agent banking deposits but the growth of Conventional banks outpaced the growth of Islamic banks. However, comparing the size of banking operations in the country, Islamic banks are performing better than those of conventional banks in this area. This may because of either expansion of agent banking by Islamic banks or increase in confidence level of the depositors in Islamic banking or any other factor. However, In order to keep up this competitive advantage over conventional banking, Islamic Banks may consider expanding outreach, introducing digital services, and strengthening agent networks etc. (Fig.7, Table-3).

1.8 Manpower

The manpower position of Islamic banking operations within the Banking sector in Bangladesh shows a declining trend during the period November 2023 to June 2026 (Table-2). Total manpower in Islamic Banks stood at 45225 in June 2026 decreased from 45294 in May 2026, indicating a month-on-month decrease of 0.15%. On the other hand,



the total manpower was 48709 in June 2025 which indicates a year-on-year decline of 7.15%.

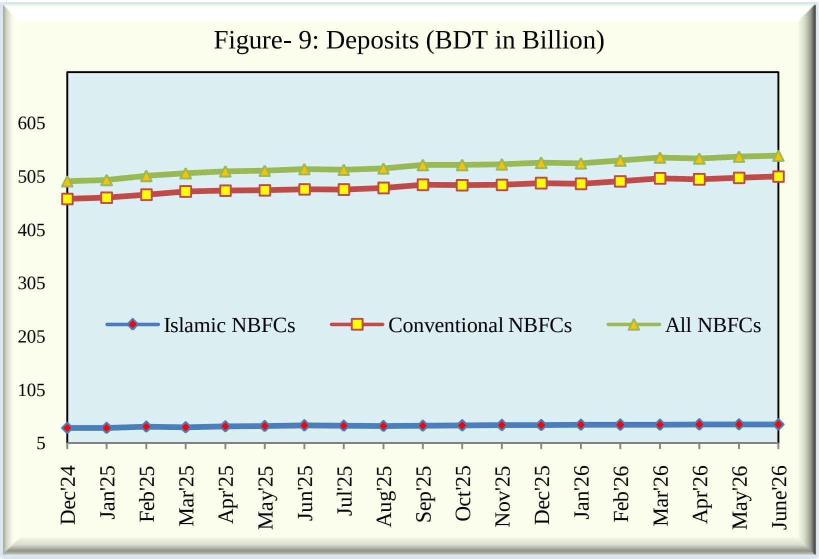
Several contextual factors may explain this scenario. In general, increasing digitalization and automation of financial services have reduced the need for manual administrative and operational staff in many financial institutions. After July 2024 uprising, some unstable situation arises due to improper management of Islamic banks specially in full-fledged Islamic Banks, manpower shows a declining trend. On the contrary, conventional banks having sharia'h based banking operation are enhancing their Islamic banking activities with increase of manpower gradually.

The number of specialized employees in Islamic banking is 579 which indicates stable position both in May and June, 2026. However, compared to 575 employees in June 2025, the sector recorded a year-on-year growth of 0.70%. This increase reflects a continued emphasis on professional specialization and the development of Shariah-compliant expertise within Bangladesh's Islamic banking industry. The growth may be driven by increasing awareness of Islamic finance, higher demand for professionals with certifications such as CSAA and CIPA, and the rising significance of Shariah governance, compliance, and risk management practices across Islamic financial institutions.

2. For Islamic NBFCs

2.1 Deposits

The deposit trend of the Non-Bank Financial Companies (NBFCs) sector in Bangladesh exhibited a steady upward trajectory over the period from December 2024 to June 2026 (Fig-9). Total deposits increased from BDT 496 billion in December 2024 to BDT 544 billion in June 2026, reflecting gradual expansion of the sector. Conventional NBFCs consistently dominated deposit mobilization, contributing the largest share (92.77%) during the reference month, while Islamic NBFCs, though relatively small (7.23%), showed moderate but stable growth.



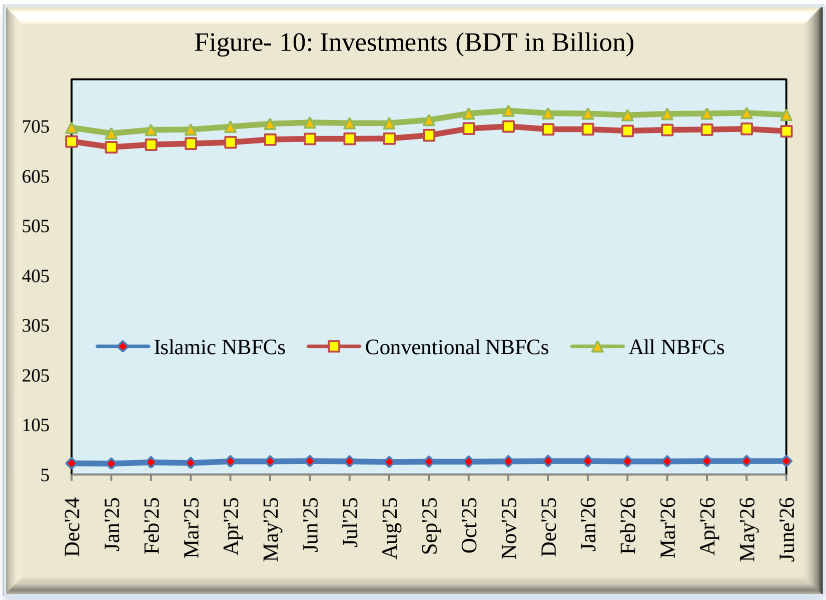
In case of conventional NBFCs, deposits stood at BDT 505 billion in June 2026, increasing from BDT 502 billion in May 2026, indicating a month-on-month increase of about 0.47%. On a year-on-year basis, deposits rose from BDT 481 billion in June 2025 to BDT 505 registering a growth of approximately 4.94%. This steady increase can be attributed to several factors in our country, including higher deposit rates offered by NBFCs compared to banks and growing demand for alternative financing channels alongside the banking sector.

Focusing on Islamic NBFCs, deposits stood at BDT 39 billion in June 2026, decreasing from BDT 40 billion in May 2026, indicating a month-on-month decrease of about 1.40%. On a year-on-year basis, deposits increased from BDT 38 billion in June 2025 to BDT 39 billion in June 2026, reflecting a growth of around 4.83%. The year-on-year growth suggests a gradual shift in depositor preference toward Shariah-compliant financial products in Bangladesh. Factors such as increasing religious awareness and the expansion of Islamic financial institutions have contributed to this trend. Islamic NBFC deposits remain highly concentrated in Mudaraba-based instruments, accounting for nearly 99.06% of total deposits, which highlights the strong preference for profit-sharing modes among depositors. As of June 2026, the private sector contributed the largest (72.60%) share to Islamic NBFC deposits (Tables 17, 18, and 19).

2.2 Investments

The investment trend of the Non-Bank Financial Companies (NBFCs) sector in Bangladesh shows a moderate fluctuation with an overall stable pattern during the period from December 2024 to June 2026 (Fig-10). Total investments showed a modest upward trend, rising from BDT 703 billion in December 2024 to BDT 728 billion in June 2026, after reaching a peak of BDT 737 billion in November 2025. Conventional NBFCs accounted for the major share (95.57%) of total investments during the reference month, while Islamic NBFCs maintained a relatively small (4.43%) but steady contribution.

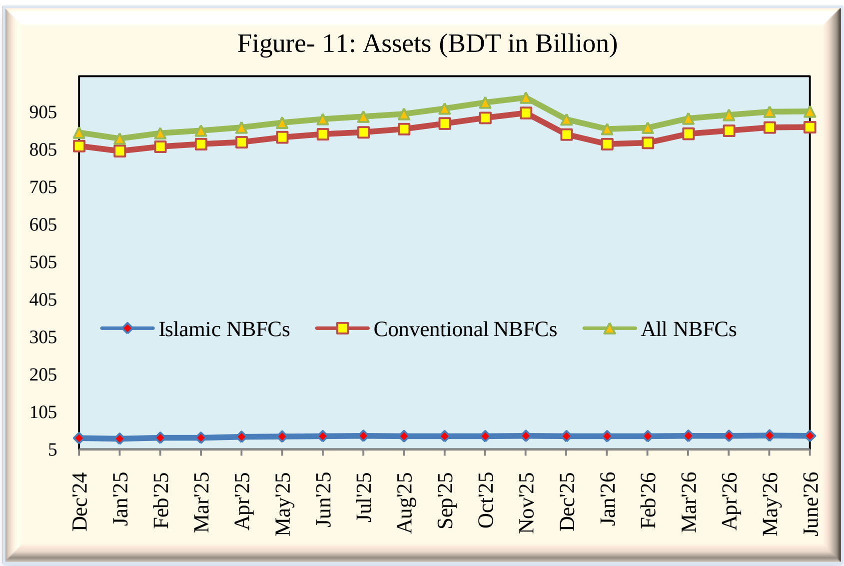
In conventional NBFCs, investments stood at BDT 696 billion in June 2026, decreasing from BDT 700 billion in May 2026, indicating a month-on-month decrease of about 0.57%. On a year-on-year basis, investments increased from BDT 680 billion in June 2025 to BDT 696 billion in June 2026, registering a growth of approximately 2.28%. The positive year-on-year growth suggests that overall investment activities expanded over the year, supported by demand for financing in sectors such as trade, industry, and SMEs, as well as relatively higher returns offered by NBFCs compared to traditional banking channels.



Focusing on Islamic NBFCs, investments stood at BDT 32 billion in June 2026, decreasing from BDT 33 billion in May 2026, indicating a month-on-month decrease of about 1.03%. On a year-on-year basis, investments also decreased from BDT 33 billion in June 2025 to BDT 32 billion in June 2026, reflecting a decline of around 0.97%.The relatively stable investment level of Islamic NBFCs throughout the period from June 2025 to June 2026, characterized by minor fluctuations of around BDT 1–2 billion, suggests a restrained growth environment. This trend may reflect subdued financing demand, liquidity pressures, limited availability of Shariah-compliant investment avenues, prudent risk-management practices, intensified competition from Islamic banking institutions, and the overall slowdown in private-sector investment activities in Bangladesh. It is also notable that more than half of these investments were deployed through HPSM (36.42%) and Ijarah (27.77%) modes during that period. Islamic NBFC investments were disbursed across various sectors for diverse economic purposes, with the majority directed towards industry and trade & commerce (Tables 20, 21, and 22).

2.3 Assets

The asset position of the Non-Bank Financial Companies (NBFCs) sector in Bangladesh exhibited a fluctuating but overall expanding trend during the period from December 2024 to June 2026 (Fig-11). Total assets increased from BDT 850 billion in December 2024 to a peak of BDT 943 billion in November 2025, before declining and stabilizing at BDT 906 billion in June 2026. Conventional NBFCs consistently held the dominant share (95.44%) of total assets, while Islamic NBFCs contributed a



comparatively smaller (4.56%) but steady portion. The overall trend suggests a phase of strong asset growth until late 2025, followed by a contraction likely reflecting adjustments in investment portfolios and tighter financial conditions in the economy.

In case of conventional NBFCs, total assets stood at BDT 864 billion in June 2026, increasing from BDT 863 billion in May 2026, indicating a month-on-month growth of about 0.12%. On a year-on-year basis, assets rose from BDT 845 billion in June 2025 to BDT 864 billion in June 2026, reflecting a modest growth of approximately 2.25%. The positive year-on-year growth indicates that conventional NBFCs regained some momentum despite elevated non-performing loans (NPLs), high cost of funds, and prevailing macroeconomic pressure including inflation and exchange rate volatility.

Concerning Islamic NBFCs, total assets of Islamic NBFCs stood steady at BDT 41 billion in June 2026, slightly declined from BDT 42 billion in May 2026, representing a decrease of approximately 1.13%. On a year-on-year basis, assets increased from BDT 40 billion in June 2025 to BDT 41 billion in June 2026, representing a growth of approximately 2.51%. The higher year-on-year growth suggests continued expansion of Islamic financial operations. This growth can be linked to increasing demand for Shariah-compliant financing, particularly through profit-sharing and asset-backed modes. However, the relatively small scale and limited diversification of Islamic NBFCs may constrain faster asset expansion in the short run.

2.4 Manpower

Total manpower in Islamic NBFCs decreased compared to previous month and stood at 328 employees in June 2026. On a year-on-year basis, manpower declined significantly from 371 employees in June 2025 to 328 employees in June 2026, registering a contraction of 11.59%. This declining trend reflects a cautious operational strategy adopted by many NBFCs in Bangladesh amid persistent macroeconomic challenges, including high inflation, rising cost of funds, liquidity pressure, and slower expansion of financing activities. In addition, the increasing adoption of digital financial services and operational automation may have reduced the need for workforce expansion in the sector.

Despite the overall decline in total manpower, the number of specialized employees in Islamic Banking and Finance remained unchanged at 11 in June 2026 compared to May 2026, while increasing from 9 employees in June 2025. This slow but steady growth indicates a gradual strengthening professional specialization and institutional emphasis on Shariah-compliant expertise in Bangladesh. The increase may be attributed to rising awareness of Islamic finance, growing demand for qualified professionals holding certifications such as CSAA and CIPA, and the expanding importance of Shariah governance and compliance and risk management within Islamic financial institutions.

Figure- 12: Manpower

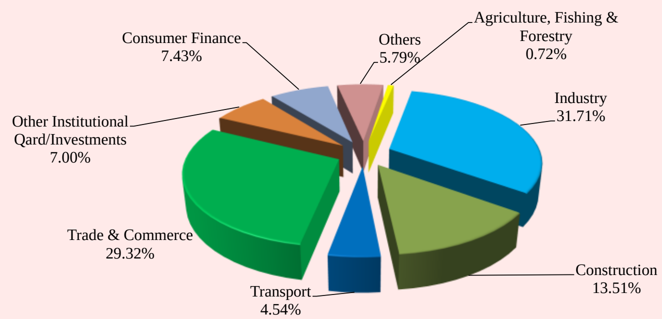
Chart 16: Percentage of various Investments of Islamic NBFCs in terms of Economic Purposes , June'26



Concluding Remarks

In this study it is found that during the study period Islamic banks held approximately one-fourth of total deposits of the banking industry and large amount of deposits were collected through Mudarabah deposits scheme. At the same time the study also finds that largest amount of deposits of Islamic banks was accumulated from the private sector among all sectors in Bangladesh.

This study reveals that in case of investment, Islamic banking investment contributed approximately one-fourth of total investment in the banking industry. Full-fledged Islamic banks play vital role in sanctioning Islamic investment which is about 89% of total Islamic investment while investment sanctioned by other Conventional banks having Islamic branches and windows is only 11% of total Islamic investment. Full-fledged Islamic banks, branches and windows sanctioned significant amount of investment in Bai-Murabaha (42%). About 41% of investment was sanctioned for the industry sector, 31% of investment was sanctioned for the trade & commerce sector. It is important to mention that agent banking, school banking, mobile financial services, e-banking and e-commerce are now administered through Islamic banking. Approximately 16% of total worker's remittance collected through Islamic banking channel. Furthermore, approximately half (49%) of total agent banking deposits in banking industry belongs to Islamic banking.

Islamic banking has been playing a significant role in Bangladesh over the last couple of decades. On the other hand, Islamic NBFCs have many opportunities to expand their services in order for capturing market shares of deposits, investments and assets. As Sharia'h based transactions are becoming popular to the mass people, so there is a great opportunity to expand Islamic banking activities in both rural and urban areas and to disseminate Islamic banking knowledge to the people of the grass-root level of the country. Islamic banking activities are expanding in parallel with conventional banking day by day. This will promote financial inclusion which ultimately would strengthen the financial system of the country.
