Chapter 1: Introduction

1.1 Introduction

Remittances are among the most important sources of a country's foreign exchange reserves and play a vital role in its economic growth and development. Remittances represent household income from foreign economies arising mainly from the temporary or permanent movement of people to those economies. Remittances include cash and non-cash items that flow through formal channels, such as electronic wire transfers, or through informal channels, such as cash or goods carried across borders. When migrants send part of their earnings to their home in the form of either cash or goods to support their families, these transfers are known as workers' or migrant remittances. It has grown rapidly over the past few years and now accounts for the largest share of foreign income for many developing economies.

Remittances play an increasingly vital role in the economies of small and developing countries, including for disaster relief, often exceeding official development assistance (ODA). They help raise the standard of living for people in low-income nations and help combat global poverty. In fact, since the late 1990s, remittances have exceeded development aid and, in some cases, accounted for a significant share of a country's gross domestic product (GDP).

Workers' remittances play a pivotal role in Bangladesh's economy, serving as one of the largest sources of foreign exchange. The Bureau of Manpower, Employment, and Training (BMET) has reported that from 1976 to December 2025, 18.07 million people obtained BMET licenses for overseas work. Inward remittances from Bangladesh expatriates are very significant for the nation and the Bank. Expatriate remittances are one of the largest sources of foreign currency. Manpower export plays an important role in poverty alleviation and helps reduce unemployment, the core problem of a densely populated country like Bangladesh.

In recent years, Workers' remittance inflows have been crucial for maintaining economic stability, particularly amid global economic uncertainties and domestic challenges. In the current political and economic landscape, marked by inflationary pressures, exchange rate fluctuations, and rising import costs, remittances have provided much-needed relief by bolstering foreign currency reserves and supporting millions of households across the country. As a stabilizing factor, the steady flow of remittances has contributed to poverty reduction, improved living standards, and regional development. In the context of the ongoing post-pandemic economic recovery and political transitions, remittances are even more crucial for sustaining economic growth, ensuring liquidity in the banking sector, and reducing reliance on external borrowing.

According to World Bank estimates, global workers' remittance flows reached US \$905 billion in 2024. Of this total, approximately US \$685 billion was directed to low- and middle-income countries (LMICs), underscoring the crucial role of remittances in supporting household consumption, investment, and external balances in developing economies. With an

estimated inflow of US \$129 billion in 2024, India remained the world's largest recipient of remittances, followed by countries such as Mexico, China, the Philippines, and Egypt (Source: [World Bank, 2024](#)). In this global context, Bangladesh recorded an impressive US \$30.3 billion in inward remittances during FY 2024-25.

1.2 Structure of the Publication

This publication presents an in-depth analysis of workers' remittance inflows to Bangladesh, focusing on several key dimensions. The Monthly Trend of Workers' Remittance Inflows section examines short-term fluctuations in remittance receipts over recent months, while the Yearly Trend Analysis provides a broader perspective on long-term growth patterns.

A detailed country-wise breakdown of remittances from the top 15 source countries offers valuable insight into the major corridors contributing to Bangladesh's remittance inflows. Furthermore, the region-wise, division-wise, and district-wise analyses illustrate the geographic distribution of remittance earnings across the country, highlighting areas where these funds exert the most significant socioeconomic impact.

In addition, scheduled bank-wise, district-wise and country-wise time series data have been incorporated as annexure to enhance the analytical depth of this publication. Together, these components provide a comprehensive overview of remittance trends, facilitating informed policy analysis and decision-making.

1.3 Data Source

Considering the significance of remittances to the economy, the Statistics Department of Bangladesh Bank has collected daily remittance data from Non-Resident Bangladeshis working abroad (remitters) since June 2016. Prior to this, the Foreign Exchange Policy Department was responsible for collecting wage remittance data. The remittance figures presented in this publication are compiled daily from all scheduled banks operating in Bangladesh. These banks aggregate data through multiple channels to ensure comprehensive coverage of workers' remittance inflows. The head offices of ADs must upload daily workers' remittance transactions, based on disbursements to beneficiary accounts, in a consolidated format. This report should include data from all AD branches and departments, organized by currency and district, using the RIT template T_ME_D_REMITTANCE maintained by the Statistics Department, Bangladesh Bank, Head Office, Dhaka. ADs must ensure that all NRB (Wage earners) remittance data are fully covered in this template and in the summary statement FCS-7, along with schedules FCR-1, 2, 3, and 4.

The primary sources of data collection are as follows:

- Inward remittance deposits through banking channels into Foreign Currency (FC) accounts, as well as FDD/TTs purchased from Bangladeshi nationals abroad for family support, are reported in FCR-1.

- Inward remittances received through Taka accounts of non-resident bank branches, correspondents, exchange houses, and subsidiaries abroad are reported in FCR-2, based on disbursement to beneficiaries' accounts.
- Local deposits into foreign currency accounts, such as drafts, traveler's cheques, and cash, as well as purchases from Bangladeshi nationals abroad, are reported in FCR-3.

This multi-channel approach enables real-time tracking of remittances and provides a robust dataset for analysis. The timely and detailed collection of remittance inflows enables the presentation of accurate, up-to-date trends, offering critical insights into the flow of foreign exchange into Bangladesh.

1.4 Implications for Policy Analysts and Stakeholders

This publication provides essential data for policymakers, government ministries, and research organizations to inform decisions that support the migrant workforce and maximize the economic benefits of remittances. The Ministry of Finance, Ministry of Expatriates' Welfare and Overseas Employment, and Planning Commission can use these data to design targeted policies that facilitate remittance flows, enhance financial inclusion for recipients, and address the needs of migrant workers abroad. Furthermore, these data serve as a foundation for research institutions and policymakers to conduct further analysis on leveraging remittances to promote sustainable development, reduce inequality, and strengthen long-term economic resilience.

1.5 Authority

Article 69 of the Bangladesh Bank order, 1972 (President's Order No. 127 of 1972) authorizes Bangladesh Bank to request from Natural or Juridical persons including the government, such data or information as required for proper execution of its responsibilities.

1.6 Dissemination of Workers' Remittance Inflows Statistics

The Statistics Department of Bangladesh Bank publishes daily workers' remittance data on the Bangladesh Bank website (www.bb.org.bd) on a weekly basis. Additionally, the department provides country-wise, district-wise, and bank-wise remittance data on a monthly basis at the following link: www.bb.org.bd/en/index.php/econdata/wageremittance

Statistics Department also disseminates these data to various ministries, government and non-government organizations, international agencies, consulates, and embassies as required.

Workers' remittance data is also published on a monthly basis in the National Summary Data Page (NSDP) portal of the Bangladesh Bank website.

Chapter 2: Review on Workers' Remittance Inflows in Bangladesh

2.1 Key Highlights

The significant points relating to Monthly Workers' Remittance Inflows in Bangladesh for the month of December, 2025 are presented below:

During the month of December, 2025 the workers' remittance inflows stood at USD 3,223.67 million compared to a increase of USD 333.94 million or 11.56% over the previous month November, 2025 and an increase of USD 584.89 million or 22.17% over the same month of previous year (Table-1).

During the Fiscal year 2025-26 (July-Dec) the workers' remittance inflows stood at USD 16,261.17 million compared to an increase of USD 5,124.07 million or 46.01% over the same period of previous fiscal year (Table-2).

Table 1: Comparison of Monthly Workers' Remittance Inflows

In million USD

Period	Dec, 2024	Nov, 2025	Dec, 2025	Growth (%)	
				Dec, 2025 over Nov, 2025	Dec 2025 over Dec, 2024
Remittance	2,638.78	2,889.73	3,223.67	11.56%	22.17%

2.2 Monthly Workers' Remittance Inflows

The following table shows the amount of month-wise workers' remittance inflows. By analyzing the figures, we see that the trend line of remittance inflows increases day by day. Every year, during the month of religious festivals and other occasions, remittance inflows increase. At the end of the fiscal year (June) or the calendar year (December), remittance inflows also increase. The monthly position is shown in Figure 1, and the monthly growth of remittance inflows is shown in Table-3.

Table 3: Month-over-Month Workers' Remittance Growth

Fiscal Year	Jul	Aug	Sept	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun

2.4 Division and District-wise Workers' Remittance

During the month of December 2025, the highest remittance-receiving division is Dhaka, which amounted to USD 1,609.46 million, which is 49.93% of total remittance inflows. The second highest position is Chattogram division, which amounted to USD 958.45 million, which is 29.73%, and the third position is Sylhet division, which amounted to USD 267.63 million, which is 8.30% of total remittance inflows. (Table-5)

In district-wise analysis, the top-most remittance-earning district is Dhaka (USD 1151.75 million). The other districts with higher amounts of remittance inflows are Chattogram (USD 360.56 million), Cumilla (USD 181.89 million), and Sylhet (USD 146.02 million), respectively (Table 5).
