# Executive summary

## 1. Movement of monetary indicators

**Broad money** growth slowed to 16.73 per cent (year-on-year) in May 2012 from 21.88 per cent in May 2011 due mainly to slower growth in NDA that registered a 18.50 per cent from its growth of 25.88 per cent a year ago.

*Broad money growth slowed. Growth in net credit to government was a bit higher while private sector credit growth stood lower.*

**Domestic credit** growth was lower at 19.96 per cent in May 2012 than the growth of 28.29 per cent in May 2011 (y-o-y basis). Though growth in credit to government sector was a bit higher (34.43 per cent), negative credit growth in other public sector (-2.64 per cent) and low credit growth in private sector (18.40 per cent) compared to the growth of their matching period a year ago caused domestic credit to grow slow in May 2012 (y-o-y basis).

## 2. Inflation scenario

Despite a continuous rise in non-food inflation, the annual average rate of inflation fell slightly to 10.62 per cent in June 2012 from 10.76 per cent in May 2012 due to a falling trend in food inflation. The rate of inflation on point to point basis also fell to 8.56 per cent in June 2012 from 9.15 per cent in May 2012 helped by the decline in both food and non-food inflation. Though non-food inflation picked up on average basis in June 2012 because of upward adjustment in administered fuel and power prices at the beginning of the fiscal year, it is in the downward trend on the point to point basis from March 2012. We expect the declining trend in non-food inflation will continue in the coming months of FY13 in light of the restrained monetary stance implementing by BB.

*Both point to point & average Inflation weakened. Point to point inflation has been within the single digit for last five months.*

## 3. Improvement in financial sector

**The spread** of lending and deposit rate has been declining since February 2012 and stood at 5.45% in May 2012 indicating improved efficiency of the banking industry. The weighted average **call money rate** in the inter-bank market slipped sharply down at 10.90 percent in July 2012 demonstrating adequate liquidity in the money market.

*Interest rate spread narrowed. Call money rate dropped sharply.*

## 4. External sector scenario

**Export growth** which was double digit until recent past, slowed down to a single digit (5.93 per cent) in FY12 against FY11. Most of the export items registered positive growth in July-May, 2012 with some high value items including woven garments and leather. Jute sector has been experiencing negative growth in the first 11 months of FY12.

*Trade deficits widened but current account balance improved.*

**Import payments** increased by 7.16 per cent to USD 32948.00 million during July-May, 2011-12 compared to 44.76 per cent growth during July-May, 2010-11. Import LCs opening during July-May, 2011-12 declined by 6.35 per cent compared to the growth of 39.60 percent during the same period of 2010-11.

**Remittance receipts** during FY12 increased by 10.24 per cent to USD 12843.42 million compared to the growth of 6.03 per cent during FY11.

**Aid disbursements** during FY12 was higher by USD 256.17 million or 14.41 per cent than the figure of the same period last year.

**Gross foreign exchange reserves** of the BB stood at USD 10364.43 million (with ACU liability of USD 667.61 million) as of end June 2012, against USD9520.43 million (with ACU liability of USD 336.91million) by the end of May 2012. Gross foreign exchange reserves, without ACU liability is equivalent to import payments of exactly 3.25 months based on the preceding 12 months average. BOP shows that higher earnings from remittances again succeeded in keeping current account balance positive by USD 754 million in July-May, 2011-12, higher than the level of USD 365 million of July-May, 2010-11.

## **5. Fiscal developments**

*NBR earnings beat target for FY12.*

**NBR tax revenue collection** in June 2012 was Tk.13944.72 crore which is higher by Tk.1876.97 crore or 15.55 per cent against the collection of Tk.12067.75 crore in June 2011. NBR tax revenue collection during FY12 stood at Tk.94457.37 crore which is 18.96 percent higher than the level of FY11. **Target for NBR tax revenue collection for FY 2011-12 was Tk. 91870.00 crore.**

**Borrowing** of the government through NSD certificates during July-May, 2011-12 remained positive and stood at Tk. 17249.13 crore which is 6.69 percent higher than the level of Tk. 16167.02 crore during July-May, 2010-11.

The annual average rate of inflation (12-month annual average CPI, 1995-96=100) falls to 10.62 per cent in June 2012 from 10.76 per cent of May 2012, due to a decrease in food inflation; non food inflation however, increases from 10.66 per cent in May 2012 to 11.15 per cent in June 2012. The rate of inflation on point to point basis also falls to 8.56 per cent in June 2012 from 9.15 per cent in May 2012, due to decrease in both food and non food inflation. In June, both point to point and average inflation declined. Point to point inflation has been within single digit for last few months. However, average inflation still remains in double digit.

Note : Figures in brackets indicate percentage changes over the corresponding period of the preceding year.

Import payments in May 2012 stand higher by USD 185.90 million or 6.40 per cent to USD 3093.60 million, against USD 2907.70 million in April 2012. This is however, lower by USD 198.20 million compared to May 2011 position. Import payments during July-May, 2011-12 increased by USD 7.16 per cent to USD 32948.00 million compared to July-May, 2010-11 position. Of the total import payments during the period under review, imports under Cash and for EPZ stand at USD 31066.2 million, imports under Loans/Grants USD 218.0 million, imports under direct investment USD 99.2 million and short term loan by BPC USD 1564.6 million. The low growth in cumulative import payments

and BB's cautious monetary policy stance, are contributing to ease pressure on gross foreign exchange reserves.

Settlement of import LCs during July-May, 2011-12 increased by 10.93 per cent to USD32428.36 million against USD29232.14 million during July-May, 2010-11.

Fresh opening of import LCs in May 2012 stood higher by 1.20 per cent to USD3251.70 million compared to May 2011 position. This was lower by 7.64 per cent than in the same month of the previous year. Fresh opening of import LCs during July-May, 2011-12 decreased by 6.35 per cent to USD33632.36 million against USD35912.64 million during July-May, 2010-11. Negative growth in LC opening indicating that import payment may not shoot up in near future to put pressure on BOP and exchange rate.

Trade Balance recorded a higher deficit of USD7957 million during July-May, 2011-12 compared to the deficit of USD7498 million during July-May, 2010-11. But the large inflow of workers' remittances during the period contributed to a current account surplus of USD754 million during July-May, 2011-12 (against the surplus of USD365 million during July-May, 2010-11.) Despite financial account deficit of USD641 million, a capital account surplus of USD429 million and current account surplus resulted in a surplus of USD11 million in overall balance during July-May, 2011-12 against a deficit of USD747million during July-May, 2010-11. The main driving factor behind the financial account deficit is the EPZ exports which can be repatriated and as such the net exports shown in the trade balance are counter-balanced by the equivalent amount in the financial account.
