of
Banks & Financial Institutions**

April - June, 2023

Executive Summary

The concern for environmental sustainability and inclusive growth has given mass recognition to the concept of corporate social responsibility and inclusive finance. In an emerging economy like Bangladesh, environmental management needs to be the key focus area of the business fraternity especially the banking industry being the major intermediary. Addressing environmental and social risks associated with financing activities by banks/FIs is a “must do” step in overall Credit Rating for credit approval. Stricter monitoring thereafter disbursement must go on. Accordingly, Bangladesh Bank has also integrated issues of socially responsible initiatives along with core activities of banks/FIs driving towards sustainable finance strategies.

Green and sustainable interventions and frameworks are crucial for making future development more sustainable. Forming sustainable frameworks are very much within the broader scope of sustainable development agenda of a country like Bangladesh. Banks and financial institutions (FIs) hold a unique position in an economic system that can affect production, business and other economic activities through their financing activities, and thus also influence environmental risk management in real economy, and sustainable growth. These institutions can accelerate the movement of a clean world to a large extent. For instance, these institutions can implement a 'go-green' policy for themselves and encourage client firms to adopt clean technology. In the long-term, this strategy is expected to be favorable for firms, to reduce the cost and induce the access to the new market. To advance their interest, all the financial institutions should follow the carbon footprint of their clients or projects to ensure overall sustainability.

For the first time Bangladesh Bank (BB) has defined ‘Sustainable Finance’ for Banks & FIs. This report entails the information on all the policy initiatives and operational approaches on Sustainable finance taken by BB, and the Sustainable Finance activities of Banks & FIs from April 01 to 30 June, 2023 timeline. 1. Introduction

Sustainability has become one of the mainstream considerations in the financial sector. Bangladesh by its geography is a highly vulnerable country of climate change. Recognizing that the financial sector can play a catalytic role in speeding up adoption of environmentally friendlier output practices in the real economy; Bangladesh Bank (BB) has become role model by pioneering green banking initiatives by guiding proactively the banks and NBFIs since 2011. In this context, Sustainable Finance initiatives of BB broadly categorized into the following aspects: policy initiatives, monitoring of Sustainable Finance activities of banks and NBFIs, refinance support from BB in diverse green products/sectors, and BB's own initiatives for environmental management. Introduction of Sustainable Finance Policy has given an ample opportunity for the banks and FIs to contribute to inclusive Sustainable Green Growth where Green Finance, Sustainable Agriculture, Sustainable CMSME, Socially Responsible Financing, other financing and CSR activities linked to sustainability is structurally addressed. Sustainable Finance refers to the business conducted in such areas and in such a manner that help the overall reduction of external carbon emission and internal carbon footprint.

The banking sector is one of the major sources of financing industrial projects such as steel, paper, cement, chemicals, fertilizers, power, textiles, etc., which cause maximum carbon emission. Therefore, the banking sector can play an intermediary role between economic & social development and environmental protection, for promoting environmentally sustainable and socially responsible investment.

Quarterly Review Report on Sustainable Finance has been introduced not only for the green banking activities but also covering all the components of sustainable finance under Sustainable Finance Taxonomy. This report reflects a review of banks and FIs' efforts concerning People, Planet and Profit.
