

## RATING ACTION COMMENTARY

# Fitch Affirms Bangladesh at 'BB-'; Outlook Stable

Mon 08 Nov, 2021 - 6:42 AM ET

Fitch Ratings - Hong Kong - 08 Nov 2021: Fitch Ratings has affirmed Bangladesh's Long-Term Foreign-Currency Issuer Default Rating (IDR) at 'BB-' with a Stable Outlook.

A full list of rating actions is at the end of this rating action commentary.

## KEY RATING DRIVERS

The 'BB-' rating reflects Bangladesh's resilient external finances, relatively strong growth despite the pandemic and government debt levels that remain below the peer median, against low government revenues, and weak governance indicators and banking sector.

Bangladesh's economic growth slowed significantly to 3.5% in the financial year ended June 2020 (FY20) due to the impact of Covid-19. Growth recovered to 5.5% in FY21 as pandemic containment measures were eased and consumption spending improved. We expect economic growth to accelerate to 7.0% in FY22 and 7.2% in FY23, almost double the 'BB' median's 3.7% average for 2022-2023. The global evolution of the pandemic may create risks to our growth forecast. Daily infections have been declining since August and supply disruptions that caused delays early in the vaccination programme have eased, but vaccination rates are low, as about 18% of Bangladesh's population has been fully vaccinated as of 3 November 2021.

Readymade garment (RMG) exports, which make up 80% of total exports and about 8.5% of GDP, declined in FY20 to USD27.9 billion due to lower demand from key markets, including the EU (62%) and US (18%). RMG exports rebounded to USD31.5 billion in FY21, as demand recovered in the key markets. Total exports have recovered significantly, rising by about 26% yoy in 9M21.

Remittances reached a record high of USD21.7 billion in 2020, driven by a shift to more formal remittance channels and Bangladesh Bank's 2% cash incentive for inward remittances. Growth in remittances has slowed this year, reaching USD18.9 billion by October. Authorities have indicated that the 2% cash incentive is likely to remain in place. We believe the large yoy increase in 2020 is unlikely to be repeated as some of the factors that drove the big jump in remittances were temporary.

Bangladesh's foreign-exchange (FX) reserves increased to about USD46 billion by end-September 2021, from USD43 billion at end-2020, due to the higher remittances, increased external borrowings primarily for Covid-19 relief and a pick-up in exports. We estimate FX reserve coverage of current external payments (CXP) to remain healthy at about 9.2 months by end-2021, above the 6.6 months forecast for the 'BB' median. Recent media reports suggest that according to the IMF, the actual level of international reserve assets could be lower due to the potential investment of reserves in non-liquid assets. In addition, the government could also be considering the use of a portion of international reserves to finance infrastructure projects. Bangladesh's international reserve buffers are currently adequate, but the lack of transparency in reserve management could create uncertainty and hurt the credibility of the existing policy framework.

We believe Bangladesh Bank will maintain its policy stance for a stable and competitive exchange rate through FX intervention. FX reserves could come under pressure if the authorities were to intervene aggressively to support the exchange rate in the event of an external or confidence shock. Bangladesh will continue to run modest current account deficits (averaging about -0.9% of GDP in 2022-2023) as domestic demand improves and imports of capital goods associated with large infrastructure projects resume picking up. External financing requirements in the near term are manageable. Fitch forecasts external debt servicing to be manageable in 2022 and 2023 at around 4% of current external receipts.

The pandemic has raised risks to the fiscal outlook. Revenues in FY21 exceeded the authorities' estimates and the budget deficit is likely to be lower than their current expectations. We estimate the FY21 budget deficit at 5.8% of GDP, slightly above the 5.7% forecast for 'BB' rated peers. The authorities forecast a budget deficit of about 6.2% of GDP in FY22. We expect spending on Covid-19 relief measures to continue until FY22 and withdrawn from FY23. Risks to our forecasts remain if economic recovery is weaker than the authorities' expectations or due to the extension of support measures. Fiscal risks from contingent liabilities have increased due to the economic fallout of the pandemic on state-owned enterprises (SOE) and forbearance measures still in place for the banking sector.

Bangladesh's low government revenue-to-GDP ratio remains a key weakness in the sovereign's credit profile. The official revenue-to-GDP ratio in FY20 was 9.8%, a fraction of the 'BB' median of around 28%. Introduction of a new VAT law from July 2019 has not been effective in raising the revenue ratio so far. We estimate government debt to GDP at about 38.8% in FY20, below the 'BB' median of 58.3%, but the debt-to-revenue ratio of about 396% in FY20 was far above the 'BB' median of 232%. A high proportion, almost 50%, of external debt is concessional, thus mitigating refinancing risks and reining in debt-servicing costs.

The health of Bangladesh's banking sector and its governance standards remain weak, especially among public-sector banks. The system's gross non-performing loan (NPL) ratio rose modestly to 8.2% by June 2021 from 7.7% at end-2020, but the reported figure is likely understated because of an extensive loan moratorium. State-owned commercial banks' NPL ratio of 20.6% is substantially higher than private-sector banks' 5.4%, but we expect both to rise significantly when repayment relief is withdrawn next year, provided it is not extended again. Banks' capitalisation is thin relative to prevailing risks in the market, with the system's capital ratio at 11.6% as of June 2021, and state-owned banks' at 6.8%. We believe the banking sector could be a source of contingent liability for the sovereign if credit stress intensifies.

Bangladesh's structural indicators remain a weakness relative to its peers. In addition to weaker governance indicators, foreign direct investment remains constrained by large infrastructure gaps, although the government's focus on building large infrastructure projects in the next few years could bode well for investment. The security situation in Bangladesh has improved in recent years and is now less of a concern to foreign visitors, although the risk of a recurrence of security incidents and political turmoil remains.

ESG - Governance: Bangladesh has an ESG Relevance Score of '5' for both Political Stability and Rights and the Rule of Law, Institutional and Regulatory Quality and Control of Corruption. These scores reflect the high weight that the World Bank Governance Indicators (WBG I) have in our proprietary Sovereign Rating Model. Bangladesh has a low WBG I ranking in the 21st percentile, reflecting the relatively weak rights for participation in the political process and institutional capacity, uneven application of the rule of law and a high level of corruption.

## **RATING SENSITIVITIES**

### **Factors that could, individually or collectively, lead to negative rating action/downgrade:**

- Public Finances: A sustained and rapid increase in government debt over the medium term, for example, due to the absence of structural improvements in public finances or the crystallisation of contingent liabilities related to banks or other SOEs

- Macro: Weaker medium-term growth prospects, for example, caused by a lasting impact from the Covid-19 pandemic on key sectors of the economy such as RMGs, lower remittances, or a deterioration in internal security.
- External Finances: Rapid weakening of external finances, for instance, through a significant decline in FX reserves or a sustained widening of the current account deficit.

**Factors that could, individually or collectively, lead to positive rating action/upgrade:**

- Public Finances: Increased confidence in Bangladesh's capacity to deliver fiscal consolidation and debt stabilisation over the medium term, for example, through sustained improvement in the structure of public finances in terms of a higher revenue base and lower contingent liabilities
- Structural: Significant improvement in structural indicators, for example, in terms of governance standards, including regulatory quality, political stability, control of corruption as well as the authorities' strengthening capacity and willingness to address economic challenges such as weaknesses in the banking sector.

**SOVEREIGN RATING MODEL (SRM) AND QUALITATIVE OVERLAY (QO)**

Fitch's proprietary SRM assigns Bangladesh a rating equivalent to 'BB' on the Long-Term Foreign-Currency (LT FC) IDR scale.

Fitch's sovereign rating committee adjusted the output from the SRM to arrive at the final LT FC IDR by applying its QO, relative to SRM data and output, as follows:

Structural features: -1 notch to reflect weak institutional capacity and political will to address fiscal and broader economic vulnerabilities, including long-standing vulnerabilities in the banking sector in terms of governance, asset quality and capitalisation.

Fitch's SRM is the agency's proprietary multiple regression rating model that employs 18 variables based on three-year centred averages, including one year of forecasts, to produce a score equivalent to a LT FC IDR. Fitch's QO is a forward-looking qualitative framework designed to allow for adjustment to the SRM output to assign the final rating, reflecting factors within our criteria that are not fully quantifiable and/or not fully reflected in the SRM.

**BEST/WORST CASE RATING SCENARIO**

International scale credit ratings of Sovereigns, Public Finance and Infrastructure issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating

transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of three notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit <https://www.fitchratings.com/site/re/10111579>.

## **REFERENCES FOR SUBSTANTIALLY MATERIAL SOURCE CITED AS KEY DRIVER OF RATING**

The principal sources of information used in the analysis are described in the Applicable Criteria.

## **ESG CONSIDERATIONS**

Bangladesh has an ESG Relevance Score of '5' for Political Stability and Rights as World Bank Governance Indicators have the highest weight in Fitch's SRM and are therefore highly relevant to the rating and a key rating driver with a high weight. As Bangladesh has a percentile rank below 50 for the Governance Indicator, this has a negative impact on the credit profile.

Bangladesh has an ESG Relevance Score of '5' for Rule of Law, Institutional & Regulatory Quality and Control of Corruption as World Bank Governance Indicators have the highest weight in Fitch's SRM and are therefore highly relevant to the rating and are a key rating driver with a high weight. As Bangladesh has a percentile rank below 50 for the Governance Indicator, this has a negative impact on the credit profile.

Bangladesh has an ESG Relevance Score of '4' for Human Rights and Political Freedoms as the Voice and Accountability pillar of the World Bank Governance Indicators is relevant to the rating and a rating driver. As Bangladesh has a percentile rank below 50 for the governance indicator, this has a negative impact on the credit profile.

Bangladesh has an ESG Relevance Score of '4[+]' for Creditor Rights as willingness to service and repay debt is relevant to the rating and is a rating driver for Bangladesh, as for all sovereigns. As Bangladesh has a record of more than 20 years without restructuring public debt, which is captured in our SRM variable, this has a positive impact on the credit profile.

Except for the matters discussed above, the highest level of ESG credit relevance, if present, is a score of 3. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or to the way in which they are

being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit [www.fitchratings.com/esg](http://www.fitchratings.com/esg).

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the

issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

## **SOLICITATION STATUS**

The ratings above were solicited and assigned or maintained by Fitch at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

## **ENDORSEMENT POLICY**

Fitch's international credit ratings produced outside the EU or the UK, as the case may be, are endorsed for use by regulated entities within the EU or the UK, respectively, for

regulatory purposes, pursuant to the terms of the EU CRA Regulation or the UK Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019, as the case may be. Fitch's approach to endorsement in the EU and the UK can be found on Fitch's [Regulatory Affairs](#) page on Fitch's website. The endorsement status of international credit ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.
