Chapter one: Introduction

1.1 Introduction

The yearly publication "Annual Import Payments of Goods and Services" incorporates import payments of goods under cash, loans and grants, other unclassified imports, and EPZ as well as import payments of services. Import statistics under loans and grants are collected from banking channel and other unclassified imports are obtained from CCI&E and BEPZA. Import payments of EPZ enterprises have been compiled based on banking channel import payments from fiscal year 2021-22 onwards. The book has been published in section and chapter-wise according to International Trade Classification (ITC) since 1972 but for user's convenience initiatives have been taken to organize the chapters along with sections incorporating the first 4-digits commodity codes based on ITC from fiscal year 2012-2013. The short descriptions are adopted.

Detailed information on import payments of services and import payments of agriculture, horticulture products, agri-machineries, and fertilizers have been incorporated from fiscal year 2017-18. Service data is classified according to the Balance of Payments 6th Manual (BPM6). Users are requested to read the First Schedule Bangladesh Customs Tariff book for detailed descriptions, if necessary.

1.2 Classification, valuation and time of recoding of import

1.2.1 Classification

The import data are classified by commodities and countries, by countries and commodities. This has been done in accordance with the classifications embodied in "The Harmonized Commodity Description and Coding System". In this system data are available more elaborately. Countries have been listed alphabetically.

Country classification of the import data are based on the principle of country of origin of the goods, not the country of contract or shipment. For example, a trader from Bangladesh may enter into a trade contract with a dealer in country-A for the supply of certain goods originally produced in country-B. In such a case, the country classification of import would show country-B as the source although the import was actually contracted with country-A. The country classifications of aid financed import are also recorded in general on the basis of country of origin of the goods.

1.2.2 Valuation

Generally, the banking channel reports import payments separately for each currency of settlement. The Taka valuation of the transactions for each currency is based on the monthly average of middle closing spot rates ruling on the New York exchange market.

1.2.3 Time of recording

The import figures as contained in this booklet will differ from those based on customs returns (as published by Bangladesh Bureau of Statistics) because Bangladesh Bank records the imports when the obligations are settled by means of remittances through the banking channel, while import in the customs returns is entered at the time of the physical entry of the goods into the country. Moreover, there are differences in coverage.

For example, gift parcels entering the country through postal channels and accompanied and unaccompanied dutiable baggage brought in by passengers are covered in the customs data, but the same are not reflected in the exchange records. On the other hand, the customs figures exclude such items as fuel and other commodities for ship's stores purchased by resident ship carriers in foreign ports but the exchange records include them.

1.3 Bloc/group/community/regions

The import payments statements as included in this publication have been compiled in respect of transactions with twelve country groups. The import data presented in this publication under bloc/group/community/regions may differ from the previous publication due to the worldwide political realignment. The country groups are as follows:

2.2.6 Imports by Export Processing Zone (EPZ) and Economic Zone (EZ)

In order to achieve rapid economic growth in the country by increasing the inflow of foreign investment, particularly through industrialization, special steps have been taken since 1980 by setting up an Export Processing Zone (EPZ) in the country in Chittagong (Halishahar), Dhaka (Savar) and Khulna (Mongla) where favourable facilities/assistance are provided to the potential investors, both Bangladeshi and foreigners. The Chittagong Export Processing Zone (CEPZ) started from 1983-84, while the Dhaka Export Processing Zone (DEPZ) started from 1993-94. Later, EPZs have also been established in Mongla of Khulna, Ishurdi of Pabna, Cumilla, Uttara of Syedpur in the district of Nilphamary, Adamjee of Narayanganj and Karnaphuli of Chittagong, where the investments are classified into three types, i.e., A-type (100% foreign investment), B-type (Joint venture investment between Bangladeshi and foreigners) and C-type (100% Bangladeshi entrepreneur's investment). Additionally, the BEPZA Economic Zone (BEPZA- EZ) was established in 2018 at Mirsharai, Chattogram, to promote economic progress further.

At the end of June 2025, the type-wise number of functioning enterprises in EPZ & EZ are shown in Table 2.11.
