Concepts and Definitions

Foreign Direct Investment (FDI)

Foreign Direct Investment is the category of international investment that reflects the objective of a resident entity in one economy obtaining a lasting interest in an enterprise resident in another economy (The resident entity is the direct investor and the enterprise is the direct investment enterprise). The lasting interest implies the existence of a long-term relationship between the direct investor and the enterprise and a significant degree of influence by the investor on the management of the enterprise. Direct investment comprises not only the initial transaction establishing the relationship between the investor and the enterprise but also all subsequent transactions between them and among affiliated enterprises, both incorporated and unincorporated. A direct investment enterprise is an incorporated or unincorporated enterprise in which a direct investor owns 10 percent or more of the ordinary shares or voting power for an incorporated enterprise or the equivalent for an unincorporated enterprise (IMF, Balance of Payment Manual, 5th addition, 1993, page-86). The components of FDI are: a) Equity capital b) Reinvested earnings and c) Intra-company loans.

A **foreign direct investor** is an individual, an incorporated or unincorporated public or private enterprise, a group of related individuals, or a group of related incorporated and/or unincorporated enterprise which has a direct investment enterprise - that is, a subsidiary, associate or branch - operating in a country other than the country or countries of residence of the foreign direct investor or investors.

A **direct investment enterprise** is defined as an incorporated or unincorporated enterprise in which a foreign investor owns 10 percent or more of the ordinary shares or voting power for an incorporated enterprise or the equivalent for an unincorporated enterprise. A direct investment enterprise may be an incorporated enterprise - a subsidiary or associate company - or an unincorporated enterprise (branch). Direct investors may have direct investment enterprise which has subsidiaries, associates and branches in one country or in several countries.

In a **subsidiary enterprise**, a direct investor owns more than 50 percent of the shareholder's voting power; in an **associate enterprise** a direct investor owns at least 10% but not more than 50 percent of the shareholder's voting power and **branches** are wholly or jointly owned unincorporated enterprise either directly or indirectly owned by the direct investor.

Residents and Non-residents

Residents include all individuals, households, enterprises or other organizations operating in Bangladesh, regardless of whether they are citizens of the country or not, and/or are owned by Bangladeshi citizens or foreigners. These units have their centers of economic interest in Bangladesh. Branches, subsidiaries and affiliates of foreign banks and enterprises operating in Bangladesh and

persons who normally live in Bangladesh for one year or more are Bangladeshi residents, regardless of citizenship.

Non-residents are individuals, households, enterprises or other organizations ordinarily domiciled in a country other than Bangladesh. Non-resident branches and subsidiaries of Bangladeshi banks and enterprises operating in another country are examples of non-residents, as are persons who do not normally live in Bangladesh.

Foreign Assets and Liabilities

An asset or liability must represent actual claims that are legally in existence. Foreign assets of resident enterprise/company/entity comprise its claims on non-residents and liabilities comprise its indebtedness to non-residents.

Intra-company loans

Intra-company loans or intra-company debt transactions refer to short or long-term borrowing and lending of funds between direct investors (parent enterprises) and affiliate enterprises. The traditional distinction between short and long term maturity based on the formal criterion of original maturity retained.

Short-term debt is defined as debt with an original maturity of one year or less. It includes loans, overdrafts, suppliers' credit, buyers' credit, deferred payment etc. of a resident enterprise borrows from direct investors.

Long-term debt is defined as debt with an original maturity of more than one year. It includes loans, overdrafts, suppliers' credit, buyers' credit, deferred payment etc. of a resident enterprise borrows from direct investors.

It also arises due to *advance payments* by nonresidents to the reporting enterprise for "work that is in progress or to be undertaken". Trade Credit increases due to purchase (foreign) or import of goods (say, yarn, raw materials etc.) from non-residents and decreases when its value is paid. It is called accounts payable.

It also includes debt securities that have been sold under repurchase agreements. In long-term it also covers debt securities that have been sold under repurchase agreements and debt securities that have been lent under a securities lending arrangement.

There are two types of preference shares such as

i) Participating Preference share

These preference shares have further rights that are normally linked to the relevant company's profits or dividend payment on ordinary shares.

ii) Other Preference share

Operating profit and net income

In case of foreign direct investment in Bangladesh, the survey seeks information on the profit, net income and retained earnings of the reporting enterprise (and its subsidiaries) attributable to foreign direct investors.

Operating profit includes profits from the operations of enterprises. In calculating operating profit, depreciation should be calculated at the written down replacement cost value; exchange rate gains and losses, special tax provisions (such as accelerated depreciation) and any extraordinary items should be excluded from the calculation. **Taxes** should be recorded when due without penalty.

Net income includes **income received** in the form of interest, dividends and the reinvested earnings attributable to major owners, less interest paid. **Major owners** of an enterprise include the head office in the case of a branch, the parent company in the case of a subsidiary and any enterprise in which an owner has directly or indirectly a 10 percent or more ownership interest.

Interest on debt should be reported on an accrual basis. In the case of instruments for which interest payments are made at maturity, interest accrued during the reporting period should be reported. For bonds and other deep-discounted instrument, the difference between the discounted issue price and the value at maturity should be treated as interest and reported as it accrues during the period.

External Debt

Gross external Debt, at any specific time, is the outstanding amount of those actual current and not contingent, liabilities that require payments of principal and/or interest by the debtor at some points in the future and that are owed to non-residents by residents of a country.

Valuation Principles

Data have been valued using the concept of the "own funds at book value (OFBV)".

1. Survey Methodology

Bangladesh Bank, as the central bank of the country, is responsible for compilation of FDI Statistics needed for drawing up balance of payments and international investment position of Bangladesh. The Statistics Department of Bangladesh Bank has been conducting an enterprise survey since 1995 to collect detailed information on foreign direct investment in Bangladesh. This survey is being conducted twice a year, covering the period January-June and July-December. This survey covers 100% foreign owned companies and joint-venture companies registered with Bangladesh Export Processing Zones Authority (BEPZA) and the Board of Investment (BOI) respectively. The registered projects which did not start operations till the end of the survey period are excluded from the survey. A prescribed survey questionnaire (FI -1 form) is used to collect data from FDI enterprises situated both in EPZ and Non-EPZ areas. In compliance with the Bangladesh Bank's FE Circular No-21 of November 03, 2009, the FDI enterprises are to submit the completed survey forms (FI - 1) through their designated banks for the period January-June and July-December by 30th September and 31st March respectively each year. 5. Position of Outstanding External Debt in Bangladesh

(a) Bangladesh's total stock of outstanding external debt as at end June, 2011 stood at US\$ 26010.4 million comprising public sector external debt US\$ 24425.9 million and private sector external debt US\$ 1584.5 million. The share of public sector external debt in the total external debt stood at 93.9% while the share of private sector external debt stood at 6.1% as at end June, 2011 (Figure-14). The trend shows that public sector external debt has increased steadily over the periods up to 2010-11 but private sector external debt has increased up to 2009-10 and moved downward as at end 2010-11 (Figure-15, Table-6).

(b) External debt as at end June, 2011 recorded an increase of US\$ 1795.7 million or 7.4% over end June, 2010 on account of significant increase of I.D.A. credit against Public sector external debt.

The public sector external debt increased by US\$ 1863.0 million or 8.3% to US\$ 24425.9 million as at end June, 2011 compared to the increase of US\$ 656.3 million or 3.0% as at end June, 2010.

Private sector external debt decreased by US\$ 67.3 million or 4.1% to US\$ 1584.5 million as at end June, 2011 compared to the increase of US\$ 46.3 million or 2.9% as at end June, 2010 (Figure-15, Table-6).

- (c) An assessment of sustainability of the external debt has been carried out based on two important macroeconomic indicators viz. ratio of current account receipts (CAR) to debt and ratio of debt to GDP which were 146.5% and 23.5% respectively as at end June, 2011. The trend of debt to GDP ratio shows that it has been steadily decreasing while the ratio of current account receipts to debt has been steadily but significantly increasing over the periods with more than 100% coverage in last four years successively. It appears from the ratio analysis that the level of external debt is well managed and quite sustainable in Bangladesh (Figure-16, Table-6).
