FOREWORD

The inflow of foreign capital, in the form of Foreign Direct Investment (FDI) and External Debt, has considerably increased in developing countries during the last few decades. FDI inflow supports the rising investment requirements to boost economic growth at higher pace and helps macroeconomic stability in the economy. FDI inflows in Bangladesh remained negligible until 1993, but Bangladesh has been quite successful in attracting FDI inflows since 1996. Bangladesh has also encouraged external borrowings from the year 2000 to sustain the growth rate of the economy, which is otherwise not feasible with the given domestic resources.

From the very beginning of Bangladesh Bank, its Statistics Department has been publishing various important publications which have been used for research purposes towards socio-economic development of our country. Following this, the FIED Management Cell of the Statistics Department of Bangladesh Bank is going to publish a booklet titled 'Foreign Investment and External Debt Statistics' bi-annually. This booklet entails sufficient information on Foreign Direct Investment (Inward & Outward), Portfolio Investment and External Debt of Bangladesh.

I sincerely believe that this booklet will be very helpful for researchers, policy makers, general public and outsiders.

CHAPTER -I

FOREIGN DIRECT INVESTMENT

SECTION-I

Introduction:

Over the past three decades the key features of economic policymaking in many countries particularly in the developing world is attracting foreign direct investment (FDI). FDI performs a multidimensional role in the overall development of the host economies. Most of the studies advocate a positive relationship between foreign direct investment and economic growth. FDI makes a vital contribution to growth and development in Asia and the Pacific.

Investment or creation of capital is very important for the growth and prosperity of an economy. Investment may lead to the creation of physical capital goods, finance and human capital. In grouping with other factors of production and technology, investment determines the levels and growth through changes in production and consumption of goods and services. Both domestic investment and foreign investment are equally needful whereas domestic investment may lead to the creation of domestic savings, consumption & employment and foreign investment can decrease the saving gap.

Bangladesh is quite successful in attracting FDI inflows since the inception of economic reform in 1995. The inflow of FDI has contributed significantly to the economic development of Bangladesh. During the period CY 2021, FDI net inflow of Bangladesh is USD 2.9 billion as against USD 2.6 billion at CY 2020.

Bangladesh Bank, Statistics Department has been conducting an enterprise survey since 1995 to collect detailed information on FDI in Bangladesh. Now FDI data is compiled and published on quarterly basis in the Bangladesh Bank website www.bb.org.bd.

covered regularly.

CHAPTER -II

Portfolio Investment in Bangladesh SECTION-I

1. Introduction:

The Portfolio Investment is the entry of funds into a country by non-resident individual/institute to make investment in the country's stock and bond markets.

It is increasingly appreciated that improved markets for investment in equities can help promote economic growth faster. Such improvement also allows the ordinary saver to share in that growth.

Equity markets can play an important role in stimulating economic growth faster by encouraging savings, by directing savings into more productive channels and by making managers more publicly accountable for the performance of their companies. All countries need to improve the efficiency of their capital markets but understandably the deficiencies are much greater in developing countries.

SECTION-II

Methodology of Portfolio Investment compilation:

Non-resident persons/institutions including non-resident Bangladesh nationals may buy Bangladeshi shares and securities in Bangladesh against freely convertible foreign currency remitted from abroad through the banking channel. Transactions relating to such investments including repatriation of dividend/interest earnings and sale proceeds shall be made through a Non-resident Investor's Taka Account (NITA).

Bangladesh Bank, the Central Bank of Bangladesh, compiles Portfolio Investment (PI) statistics through NITA account to draw up country's Balance of Payment (BoP) and International Investment Position (IIP).

Data Series: Annual data spanning from 2010 to 2021 is available. The Statistics Department of Bangladesh Bank officially started compiling Portfolio Investment (PI) data through NITA account since 2010.

Data Source: The information of equity securities is collected from Authorized Dealer (AD) bank branches under Std. Circular Letter no.-02/2015 by the Statistics Department and collected secondary information of debt securities from Monetary and Financial Statistics Division, Statistics Department, Bangladesh.

Data Collection: Authorized Dealer (AD) bank branches are responsible to submit PI return within 15 days following the reference month. A prescribed form named FORM PI-1 is used to collect data. The form contains general information, NITA statement and market transaction information of an investor. These collected data are inputted on two RIT's named T_ME_M_PORT_INV (market transaction data) and T_ME_M_PORT_SURVEY (NITA statement) and uploaded in Bangladesh Bank EDW-web portal by scheduled banks.

Data Coverage: For Portfolio Investment data coverage is 100% and covers PI inflows, outflows, purchase, sale and stock by sectors and countries.

CHAPTER –III

Outward Foreign Direct Investment (OFDI) of Bangladesh SECTION-I

1. Introduction:

In recent years, companies from the developing world have increasingly invested abroad, seeking business opportunities outside their own home countries. Bangladesh is walking very carefully for investing abroad. But in September 2015, the government amended the 1947 Act by adding a "conditional provision" that permits outbound investment for export-related enterprises. Here it can be mention that some Bangladeshi bank branches and exchange houses operated their business in abroad. By the dint of amendment outward foreign direct investments (OFDIs) by Bangladeshi firms has increased significantly. Now such investments by Bangladeshi firms have gone to more than 20 host countries.

2. Overview:

The major developments relating to outward foreign direct investment (OFDI) of Bangladesh at the Calendar Year 2021 are presented below.

- At the Jul- Dec'2021 total Net Outward Foreign Direct Investment (OFDI) decrease of USD 1.17 million over Jan-Jun'2021 but an increased by USD 32.37 million over its level Jul-Dec'2020. This was mainly due to disinvestment higher than gross outflows (**Table-1**).
- In the year 2021, Gross FDI outflows was placed at USD 94.69 million, recording an increase of 204.9 % million over its level at the financial year 2020 (**Table-1**).

Methodology of Outward Foreign Direct Investment compilation:

Bangladesh Bank, the Central Bank of Bangladesh, compiles **outward Foreign Direct Investment** statistics to draw up country's balance of payment (BoP) and International Investment Position (IIP).

Data Series: Annual data spanning from 2001 to 2021 is available. The Statistics Department of Bangladesh Bank officially started compiling of foreign direct investment to abroad statistics since 2001.

Data Source: Bangladesh Bank's FE Circular No-21 of November 03, 2009 and the subsequent circulars Statistics Department Circular No. 1 of August 14, 2012 and Std. Circular no. 3 of May 12, 2014, the OFDI enterprises are to submit the completed survey forms (FORM FI-2) through their designated banks on quarterly basis.

Data Collection: Authorized Dealer (AD) bank branches are responsible to submit OFDI return within one month and 15 days following the reference quarter. A prescribed form named FORM FI-2 is used to collect data. The form contains general information, claims on non-resident, and liabilities to non-resident and operating Profit, net Income and remittances of the Reporting Enterprise. These collected data are inputted on three RIT's named T_ME_Q_INV_FOR_FI_2, T_ME_Q_INV_NON_RES_FI_2,T_ME_Q_OP_PRFT_FI_2 and uploaded in Bangladesh Bank EDW-web portal by scheduled banks.

The survey covers OFDI gross and net outflows and outstanding stock of OFDI by sectors, countries and enterprises.

CHAPTER -IV

EXTERNAL DEBT OF BANGLADESH

SECTION-I

Introduction:

Most countries in the world are engaged in lending and borrowing activities regardless of whether rich or poor. For developing / emerging economics, there are various alternative means of finance such as savings, surplus from public undertaking, taxation and deficit financing and internal & external borrowings. Development and economic growth require continued investment by both public and private sectors to drive capital accumulation, technological innovation, structural transformation and productivity growth. However, the economic development of a country may be financed either by domestic savings or by allowing and encouraging foreign investment. Usually foreign direct investment inflows are not sufficient to meet up the gap between domestic resources and investment, therefore a country may resort to borrowing from internal or external sources. Borrowing from internal sources is referred to as internal debt whereas borrowing from external sources is called external debt.

For Bangladesh, external debt is one of the important financial sources for investment. The external debt of Bangladesh is the total debt which the country owes to foreign creditors. The debtors can be the Central government, state owned enterprises, private sector enterprises of Bangladesh. The debt includes money owed to private commercial banks, foreign governments, or international financial institutions such as International Monetary Fund (IMF) and World Bank.

Bangladesh Bank, Statistics Department collects the data of private sector external debt on long term and short term basis, like commercial bank (NCB & PCB), private sector enterprises, non-bank depository corporation (NBDC). Also collects foreign liability of Central Bank and State owned enterprises (SOE). The department compiles quarterly overall debt position of Bangladesh which is published in Bangladesh Bank website www.bb.org.bd.

Economic Relations Division (ERD), Ministry of Finance publishes fiscal year status report on debt which contains country's public sector external debt position of Central Government, where separately included long term guaranteed debt position of state owned enterprises.

A Status Report 2021, compiled by Bangladesh Bank. External Debt statistics contains detailed statistical data on external debt position of Bangladesh. Debt stock of Bangladesh was USD 90.79 billion at end Dec'2021 as against USD 72.94 billion at end Dec'2020.

CHAPTER-IV

SECTION-V

Methodology of Private Sector External Debt compilation:

Statistics Department of Bangladesh Bank has a well-organized institutional setting for the compilation of statistics

on private and guaranteed debt. The department collects data of Public debt from Economic Relations Division

(ERD), Ministry of finance for the compilation of gross external debt statistics.

In this connection, Statistics Department, Bangladesh Bank ensures:

(1) The responsibility for collecting, processing, and disseminating the statistics;

(2) Keeping confidential Individual reporters' data and used for statistical purposes only; and

(3) Generation of User Defined Statistical and Managerial reports on debt status.

Data Series: Annual data spanning from 2007 to 2021 is available.

Data Source: Data on external debt is collected from Private Enterprises situated in Export Processing Zone (EPZ),

Economic Zone (EZ), Hi-teck Park Authority (HTPA) and Non-EPZ areas through Authorized Dealer branch of

commercial banks. External Debt of commercial banks and state-owned enterprises are collected from them directly.

Data Collection: Statistics Department, Bangladesh Bank collects data quarterly on private sector external debt.

This collection is generated by Authorized Dealers (AD) through particular form named ED-1 and ED-2 along with

particular templates in compliance with the Bangladesh Bank's FE Circular No-21 of November 03, 2009 and the

subsequent circulars Std. Circular no. 3 of May 12, 2014,

Data Processing: After entering data on the web based software named Debt Management and Financial Analysis

System (DMFAS), the department gives a validation checking and generates various statistical reports as required.

CHAPTER: V

DEFINITION, CONCEPTS AND POLICY FRAMEWORK SECTION-I

A) FOREIGN DIRECT INVESTMENT (FDI)

1. Definition:

Foreign Direct Investment is the category of international investment that reflects the objective of a resident entity in one economy obtaining a lasting interest in an enterprise resident in another economy (The resident entity is the direct investor and the enterprise is the direct investment enterprise). The lasting interest implies the existence of a long-term relationship between the direct investor and the enterprise and a significant degree of influence by the investor on the management of the enterprise. Direct investment comprises not only the initial transaction establishing the relationship between the investor and the enterprise but also all subsequent transactions between them and among affiliated enterprises, both incorporated and unincorporated. Simply, A foreign direct investment (FDI) is an investment made by a firm or individual in one country into the other country for the business interests and summarizes through the followings

- FDI are investments made by one company into another located in another country.
- FDIs are actively utilized in open markets rather than closed markets for investors.
- Apple's investment in People's Republic of China is an example of an FDI.

2. Direct investor:

A direct investor is an individual, an incorporated or unincorporated public or private enterprise, a government, a group of related individuals, or a group of related incorporated and/or unincorporated enterprises that has a direct investment enterprise (that is, a subsidiary, associate or branch) operating in an economy other than the economy or economies of residence of the foreign direct investor or investors.

3. Direct investment enterprise:

A direct investment enterprise is an incorporated or unincorporated enterprise in which a direct investor that is resident of another economy has 10 percent or more of the ordinary shares or voting power (for an incorporated enterprise) or the equivalent (for an unincorporated enterprise). The direct investor may be an individual, an incorporated or unincorporated private or public enterprise, a government, or an associated group of individuals or enterprises that has a direct investment enterprise in an economy other than that in which the direct investor resides. The ownership of 10 percent of ordinary shares or voting power is the criterion for determining the existence of a direct investment relationship.

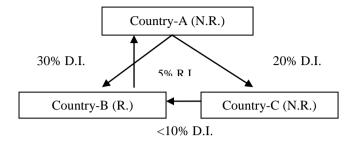

According to the international standards, direct investment enterprises include those entities that are

- subsidiaries (an enterprise in which a nonresident investor owns more than 50 percent);
- associates (an enterprise in which a nonresident investor owns between 10 and 50 percent); and
- Branches (unincorporated enterprises wholly or jointly owned by a nonresident investor) of the direct investor and are either directly or indirectly owned by the direct investor.

4. Reverse investment:

Reverse investment arises when a direct investment enterprise lends funds to or acquires equity in its immediate or indirect direct investor, provided it does not own equity comprising 10 percent or more of the voting power in that direct investor. i.e. owns some, but less than 10 percent of the voting power in, or has lent funds to, its immediate or indirect direct investor (paragraph 6.40, BPM6).

5. Fellow enterprise: An enterprise is a fellow enterprise of another if the two enterprises have the same immediate or indirect direct investor, but neither is an immediate or indirect direct investor in the other (paragraph 6.17, BPM6).

Note: $R \rightarrow Resident$; $N.R. \rightarrow Non-resident$, $D.I. \rightarrow Direct Investment$, $R.I. \rightarrow Reverse Investment$

- i) A is a direct investor in B;
- ii) B is a reverse investor in A;
- iii) A is a direct investor in C and;
- iv) C is fellow enterprise of B.

6. Equity Capital:

Remittances received by the incorporated or unincorporated direct investment enterprises operating in Bangladesh on account of equity participation in those by the non-resident direct investors. Equity capital comprises:

a) Ordinary Shares:

This item represents the total paid-up capital against issue of ordinary shares.

b) Revaluation & Capital Reserves:

This item comprises revaluation reserve, capital reserve, non-remittable special capital reserve, non-distributable special reserve and premium on shares.

c) Share Money Deposits:

These are the deposits of the shareholders to get ordinary shares in future.

d) Other Reserves:

This item comprises tax holiday reserve, reserve for bonus share, general reserve, special reserve etc.

7. Reinvested earnings:

In a relationship between a direct investor and a direct investment enterprise (DIE), the net current earnings of a DIE that are not distributed as dividends to the shareholders (or the equivalent in the case of quasi-corporate enterprises) are deemed distributed, as investment income, to the direct investor (DI), proportionate to its (their) holdings of shares (or equivalent) in the DIE. As this is an imputed transaction, a counterpart imputation (of equal value but opposite direction) is required in the financial account representing the reinvestment of the funds back into the DIE. The income imputation is referred to as reinvested earnings (RE), while the financial account entry is referred to as reinvestment of earnings income, to differentiate it from the income transaction.

8. Intra-company Loans:

Intra-company loans or intra-company debt transactions refer to short or long term borrowing and lending of funds between direct investors (parent enterprises) and affiliate enterprises. The traditional distinction between short and long term maturity based on the formal criterion of original maturity retained.

- i) Short-term debt is defined as debt with an original maturity of one year or less. It includes loans, overdrafts, suppliers' credit, buyers' credit; deferred payment etc. of a resident enterprise borrows from direct investors.
- **ii)** Long-term debt is defined as debt with an original maturity of more than one year. It includes loans, overdrafts, suppliers' credit, buyers' credit; deferred payment etc. of a resident enterprise borrows from direct investors.

9. Trade credit and accounts payable (Liabilities):

Trade Credits may arise due to *direct extension of credit* by buyers (non-residents) to the reporting enterprise for goods and services transactions. It also arises due to *advance payments* by non-residents to the reporting enterprise for "work that is in progress or to be undertaken". Trade Credit increases due to purchase (foreign) or import of goods (say, yarn, raw materials etc.) from non-residents and decreases when its value is paid. It is called accounts payable.

10. Trade Credit and accounts receivable (Claims):

Trade credits may arise due to *direct extension of credit* by suppliers (reporting enterprise) to non-residents for goods and services transactions. Trade credits increase due to export of goods to non-residents and decreases when its value is received. It is called accounts receivable.

11. Operating profit and net income:

In case of foreign direct investment in Bangladesh, the survey seeks information on the profit, net income, and retained earnings of the reporting enterprise (and its subsidiaries) attributable to foreign direct investors.

- i) Operating profit: Operating profit includes profits from the operations of enterprises. In calculating operating profit, depreciation should be calculated at the written down replacement cost value; exchange rate gains and losses, special tax provisions (such as accelerated depreciation), and any extraordinary items should be excluded from the calculation. **Taxes** should be recorded when due without penalty.
- **ii) Net income: Net income** includes **income received** in the form of interest, dividends and the reinvested earnings attributable to major owners, **less** interest paid. **Major owners** of an enterprise include the head office in the case of a branch, the parent company in the case of a subsidiary and any enterprise in which an owner has directly or indirectly a 10 percent or more ownership interest.

Interest on debt should be reported on an accrual basis. In the case of instruments for which interest payments are made at maturity, interest accrued during the reporting period should be reported. For bonds and other deep-discounted instrument, the difference between the discounted issue price and the value at maturity should be treated as interest and reported as it accrues during the period.

12. Flows and Stocks:

All of the data recorded in the macroeconomic statistical systems are either flows or stocks (stocks are also referred to as positions or stock positions). Flows measure changes in the level of economic value over a period of time, while stock positions measure the level of economic value at a specific point of time. The term economic value refers to a unit's assets, liabilities and net worth. The flows and stock positions recorded in the macroeconomic statistical systems are integrated, which means that changes in stock positions can be fully explained by the flows.

FDI capital flows are recorded on a net basis, in the same manner as other cross border financial flows, i.e., investments during the reporting period are netted against disinvestments, separately for claims and liabilities.

i) **Gross inflows** are the total inward direct investment made by non-resident investors in the reporting economy. **Gross outflows** are the total outward direct investment made by the residents of the reporting economy to external economies.

- ii) **Disinvestment** includes capital repatriation, reverse investments, loans given to parent firms and repayments of intra-company loans to parent firms.
- iii) **Net inflows** are the Gross inflows minus disinvestment. **Net outflows** are the Gross outflows minus disinvestment.

In general, net recording of flows in financial assets and liabilities are recommended in the international accounts from both the analytical and pragmatic perspectives. Net acquisition of external financial claims and net incurrence of external liabilities are generally of more analytical interest than the gross flows. (Balance of Payment and International Investment Position manual, Sixth edition, International Monetary Fund, Para 3.117)

13. Foreign Assets and Liabilities:

An asset or liability must represent actual claims that are legally in existence. Foreign assets of resident enterprise/company/entity comprise its claims on non-residents and liabilities comprise its indebtedness to non-residents.

B) OUTWARD DIRECT INVESTMENT

An **outward direct investment** (ODI) is a business strategy in which a domestic firm expands its operations to a **foreign** country. This can take form as a green field **investment**, a merger/acquisition, or expansion of an existing **foreign** facility.

Direct investment in the form of equity capital comprises equity in branches, all shares in subsidiaries and associates. Outward direct investment, also called direct investment to abroad, includes assets and liabilities transferred between resident direct investors and their direct investment enterprises. It also covers transfers of assets and liabilities between resident and non-resident fellow enterprises, if the ultimate controlling parent is resident.

C) PORTFOLIO INVESTMENT

1. Definition:

Portfolio investment is defined as cross-border transactions and positions involving equity or debt securities, other than those included in direct investment or reserve assets (BPM6,para 6.54). The characteristic feature of securities is their negotiability i.e. their legal ownership is readily transferable from one unit to another unit by delivery or endorsement. Negotiable instruments are designed to be traded on organized markets (BPM6, para 5.15) The major components of portfolio investment classified under liabilities are equity securities (ordinary shares, preference shares and bonus shares etc.) and debt securities (debentures, bonds & notes, money market instruments and financial derivatives) both traded and tradable in organized and other financial markets.

2. Security:

Definition of security: Section 2 of the FER Act, 1947 defines "security" either in physical or demat form,- i) Shares, stocks, bonds, debenture stock and Government securities, as defined in the Securities Act, 1920;

- ii) Deposit receipts in respect of deposits of securities, units of mutual fund or collective investment scheme, as defined in Securities and Exchange Commission (Mutual Fund) Rules, 2001; and
- iii) Other instruments defined as security in the Securities and Exchange Ordinance, 1969 (Ordinance No. XVII of 1969); but does not include bill of exchange or promissory notes other than Government promissory notes. A "foreign security" is defined as a security issued elsewhere than in Bangladesh and any security the principal of or interest on which is payable in any foreign currency or elsewhere than in Bangladesh.

2.1 Equity securities:

A security is defined as an instrument that is traded or tradable. It covers all instruments and records acknowledging, after the claims of all creditors have been met, claims to the residual values of enterprises. Equity securities comprise:

- a) Ordinary Share: This item represents ownership share with full voting rights. Ordinary shares are usually issued in registered form.
- b) Preference share: Part of the share capital of a company that ranks after secured creditors but before ordinary shareholders in the event of liquidation. Preference rights are defined in the articles of association of the relevant company but may relate to dividend, voting rights, or distribution of surplus assets. There are two types of preference shares such as
 - i) Participating Preference share: These preference shares have further rights that are normally linked to the relevant company's profits or dividend payment on ordinary shares.
 - **ii**) Other Preference share: These will have the rights of standard preference shares but may also be:
 - cumulative (i.e., income arrears are carried forward to the next payment date),
 - convertible (into ordinary shares),
 - redeemable (at a fixed date or contingent on a special event), or
 - Permanent (not redeemable except at issuer's option).
- c) Share Money Deposits: These are the deposits of the shareholders to get ordinary shares in future.
- d) Other: It covers shares in mutual funds and investment trusts, depository receipts etc.

2.3 Debt Securities:

A debt security is a debt instrument that can be bought or sold between two parties and has basic terms defined, such as the notional amount (the amount borrowed), interest rate, and maturity and renewal date. Examples of debt securities include a government bond, corporate bond, certificate of deposit (CD), municipal bond, or preferred stock. Debt securities can also come in the form of collateralized securities, such as collateralized debt obligations (CDOs), collateralized mortgage obligations (CMOs) and zero-coupon securities.

2.4 Debt Instrument:

A debt instrument is a tool an entity can utilize to raise capital. It is a documented, binding obligation that provides funds to an entity in return for a promise from the entity to repay a lender or investor in accordance with terms of a contract. Debt instrument contracts include detailed provisions on the deal such as collateral involved, the rate of interest, the schedule for interest payments, and the timeframe to maturity if applicable.

Any type of instrument primarily classified as debt can be considered a debt instrument. Debt instruments are tools an individual, government entity, or business entity can utilize for the purpose of obtaining capital. Debt instruments provide capital to an entity that promises to repay the capital over time. Credit cards, credit lines, loans, and bonds can all be types of debt instruments.

2.5 Bonds and notes:

It covers bonds, debentures, and notes that usually give the holder the unconditional right to a fixed cash flow or contractually determined variable money income.

- **Bond:** A bond is a fixed income instrument that represents a loan made by an investor to a borrower (typically corporate or governmental). A bond could be thought of as an I.O.U. between the lender and borrower that includes the details of the loan and its payments. Bonds are used by companies, municipalities, states, and sovereign governments to finance projects and operations. Owners of bonds are debt holders, or creditors, of the issuer. Bond details include the end date when the principal of the loan is due to be paid to the bond owner and usually includes the terms for variable or fixed interest payments made by the borrower.
- **ii)** Notes Receivable: Notes receivable is an asset of a company, bank or other organization that holds a written promissory note from another party. (The other party will have a note payable.) The principal part of a note receivable that is expected to be collected within one year of the balance sheet date is reported in the current asset section of the lender's balance sheet. The remaining principal of the note receivable is reported in the noncurrent asset section entitled Investments.
- **Notes Payable:** In accounting, Notes Payable is a general ledger liability account in which a company records the face amounts of the promissory notes that it has issued. The balance in Notes Payable represents the amounts that remain to be paid. Since a note payable will require the issuer/borrower to pay interest, the issuing company will have interest expense. Under the accrual method of accounting, the company will also have another liability account entitled Interest Payable. In this account the company records the interest that it has incurred but has not paid as of the end of the accounting period.

2.6 Debenture:

A debenture is a type of bond or other debt instrument that is unsecured by collateral. Since debentures have no collateral backing, debentures must rely on the creditworthiness and reputation of the issuer for support. Both corporations and governments frequently issue debentures to raise capital or funds.

2.7 Other debts:

Other short-term debt covers money market instruments, such as bills, commercial paper, and bankers' acceptances that usually give the holder the unconditional right to receive a stated, fixed sum of money on a specified date. It also includes debt securities that have been sold under repurchase agreements. In long-term it also covers debt securities that have been sold under repurchase agreements and debt securities that have been lent under a securities lending arrangement.

SECTION-II

FOREIGN INVESTMENT POLICY FRAMEWORK IN BANGLADESH:

FDI Policy Framework in Bangladesh:

- **1. Evolution of the FDI policy in Bangladesh:** In the late 1980s and the 1990s, Bangladesh announced a series of measures and liberalized its FDI policy framework. In recent years, Bangladesh has significantly improved its investment and regulatory environment, including the liberalization of the industrial policy, abolition of performance requirements and allowance of full foreign-owned joint ventures. Since 1996, new sectors have been opened up for foreign investment, including the telecommunications sector.
- 2. FDI policy framework: Foreign direct investment is encouraged in all industrial activities in Bangladesh excluding those on the list of reserved industries such as production of arms and ammunitions; forest plantation and mechanized extraction within the bounds of a reserved forest, production of nuclear energy and printing and minting fresh currency notes. Such investments may be undertaken either independently or through joint ventures, either with the local, private or public sector. The capital market also remains open for portfolio investment. The policy framework for foreign investment in Bangladesh is based on the Foreign Private Investment (Promotion and Protection) Act, 1980, which provides measures for the non-discriminatory treatment and protection of foreign investment.
- **3. Incentives to foreign investment:** The government has liberalized its industrial and investment policies in recent years by reducing bureaucratic control over private investment and opening up many areas. Some of the major incentives are tax exemptions for power generation, import duty exemptions for export processing, an exemption of import duties for export oriented industries, and tax holidays for different industries. Double taxation can be avoided by foreign investors on the basis of bilateral agreements. Facilities for the full repatriation of invested capital, profit and dividend exist.
- **4.** Concessionary duty on imported capital machinery: An import duty, at the rate of 5 percent ad valorem, is payable on capital machinery and spares imported for initial installation (The value of spare parts should not, however, exceed 10% of the total C&F value of the machinery). For 100 percent export oriented industries, no import duty is charged in the case of capital machinery and spares. Duties and taxes on the import of goods that are produced locally are higher than those applicable to imports of raw materials for the production of such goods.
- **5. Intellectual property rights and investment protection:** The government recognizes the importance of intellectual property rights for attracting FDI and is making efforts to update its legislation and improve enforcement. The country has been a member of the World Intellectual Property Organization (WIPO) since 1985 and signed the Paris Convention on Intellectual Property in 1991. The Foreign Private Investment (Promotion and Protection) Act of 1980 guarantees protection against expropriation. If a foreign investor becomes subject to a legal measure that has the effect of expropriation, adequate compensation will be paid to the investor and it will be freely repatriable. The value of spare parts should not, however, exceed 10% of the total C&F value of the machinery.
- **6. Labor laws:** Workers are entitled to elect collective bargaining agents (CBAs) to negotiate their demands with management. A trade union may be formed if 30 percent of employees support it. All trade unions need to be registered. There are 47 labor laws covering matters such as wages, industrial disputes, working conditions, etc. Foreign nationals can be employed as long as their number does not exceed 15 percent of the total number of employees.

On the whole, Bangladesh has taken considerable steps to reform and liberalize all its economic policies including FDI. With low labor costs and almost no restrictions on the entry and exit of foreign investors, Bangladesh on the track toward becoming an attractive destination for FDI in the South Asian region.

SECTION-III

Definitions & Concepts of External Debt

1. External Debt:

External Debt or Gross External Debt refers to money borrowed from a source outside the country. It has to be paid back in the currency in which it is borrowed. More specifically External debt is the portion of a country's debt that is borrowed from foreign lenders including commercial banks, governments or international financial institutions. These loans including interest must usually be paid in the currency in which the loan was made.

Gross External debt or External debt is defined as "the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to non-residents by residents of an economy" {External Debt Statistics - Guide for Compilers and Users, International Monetary Fund (IMF), 2014}.

1.1 Key Takeaways:

- External debt is the portion of a country's debt that is borrowed from foreign lenders through commercial banks, governments, or international financial institutions.
- ➤ If a country cannot repay its external debt, it faces a debt crisis.
- ➤ If a nation fails to repay its external debt, it is said to be in sovereign default.
- External debt can take the form of a tied loan, whereby the borrower must apply any spending of the funds to the country that is providing the loan.

2. Classifications of External Debt:

- (1) Public and publicly guaranteed debt;
- (2) Private non-guaranteed credits;
- (3) Central bank deposits; and
- (4) Loans due to the IMF.

However, the exact treatment varies from country to country. In Bangladesh it is classified in six heads:

- (a) Multilateral
- (b) Bilateral
- (c) IMF loans
- (d) Trade credit
- (e) External Commercial borrowings (ECB)
- (f) Others

2.1 Multilateral Debt:

Multilateral creditors are primarily multilateral institutions such as the International Development association (IDA), International Bank for reconstruction and Development (IBRD), Asian Development Bank (ADB) etc. Multilateral debt is that portion of a country's external debt burden owed to international financial institutions (IFIs) such as the Asian Development Bank (ADB) and the World Bank. Borrowing from the International Monetary Fund (IMF) is not included under multilateral debt, and are instead classified separately under the IMF head.

2.2 Bilateral Debt:

Bilateral creditors are sovereign countries with whom sovereign and non-sovereign entities enter into-to-one loan arrangements. Bilateral loans are funds provided to a borrower by one lender. Bilateral loans are less complicated type of participatory loan. However, as bilateral loans are agreements between one lender and one borrower, the lender risk is much higher.

2.3 IMF Loans:

A core responsibility of the IMF is to provide loans to member countries experiencing actual or potential balance of payments problems. This financial assistance helps countries in their efforts to rebuild their international reserves, stabilize their currencies and continue paying for imports and restore conditions for strong economic growth.

2.4 Trade Credits:

Trade credit is an arrangement between a seller and a buyer, where the seller allows the buyer to make purchases now and pay at a later date without incurring an interest charge. This arrangement allows the buyer to sell the goods and earn sufficient cash to pay off its debt to the seller.

Trade credit are two types i) Supplier's Credit ii) Buyer's Credit.

i) Suppliers' Credit:

Such credit is extended by the overseas supplier of goods in the form of deferred payments.

ii) Buyers' Credit:

Buyer's credit is a short-term loan facility extended to an importer by an overseas lender such as a bank or financial institution to finance the purchase of capital goods, services, and other items.

2.4.1 Export Credit:

Export credits are government financial support, direct financing, guarantees, insurance or interest rate support provided to foreign buyers to assist in the financing of the purchase of goods from national exporters

i) Export Credit Agency (ECA):

An export credit agency is an institution that offers to finance domestic companies' international export operations and other activities. ECAs provide loans and insurance to companies to help eliminate the uncertainty of exporting to other countries.

ii) Export Bill Discounting:

Export bill discounting is an international trade term and practice. Export bill discounting is designed to allow businesses faster payment for the goods they have shipped to the buyer. Export bill discounting occurs when a business contracts with a buyer for their goods on credit. In international trade, this can be called a letter of credit, and a third-party financing company uses this agreement to determine the export bill discount amount.

2.5 External Commercial Borrowings (ECB):

ECB is basically a loan availed by an Indian entity from a nonresident lender. Most of these loans are provided by foreign commercial banks and other institutions. It is a loan availed of from non-resident lenders with a minimum average maturity of 3 years. External Commercial Borrowings (ECBs) includes commercial bank loans, buyers' credit, suppliers' credit, securitized instruments such as Floating Rate Notes and Fixed Rate Bonds etc.

3. Sovereign (Government) & Non-Sovereign (Non-Government) Debt:

Sovereign debt is a central government's debt. It is debt issued by the national government in a foreign currency in order to finance the issuing country's growth and development. The stability of the issuing government can be provided by the country's sovereign credit ratings which help investors weigh risks when assessing sovereign debt investments. Non-Sovereign Debt includes the remaining components of external debt.

3.1 Sovereign Risk:

A nation is a sovereign entity. Any risk arising on chances of a government failing to make debt repayments or not honoring a loan agreement is a sovereign risk.

4. Soft Loan:

Soft loan is a loan with no interest or a below-market rate of interest. Also known as "soft financing" or "concessional funding," soft loans have lenient terms, such as extended grace periods in which only interest or service charges are due, and interest holidays.

5. Term Loan:

A term loan is a loan from a bank for a specific amount that has a specified repayment schedule and either a fixed or floating interest rate. A term loan is often appropriate for an established small business with sound financial statements. Also, a term loan may require a substantial down payment to reduce the payment amounts and the total cost of the loan.

5.1 Types of Term Loans:

Term loans are classified based on the loan tenor i.e. the period you need the funds for. Therefore, the types of term loan are Short-term, Medium-term and Long-term.

5.1.1 Short-Term Loan:

A short-term loan usually offered to firms that don't qualify for a line of credit, generally runs less than a year, though it can also refer to a loan of up to 18 months or so.

5.1.2 Medium-Term Loan:

A Medium-term loan generally runs more than one but less than three years and is paid in monthly installments from a company's cash flow.

5.1.3 Long-Term Loan:

A long-term loan runs for three to 25 years, uses company assets as collateral, and requires monthly or quarterly payments from profits or cash flow. The loan limits other financial commitments the company may take on, including other debts, dividends, or principals' salaries and can require an amount of profit set aside for loan repayment.

6. Concessional Debt:

These are loans that are extended on terms substantially more generous than market loans. The concessionality is achieved either through interest rates below those available on the market or by grace periods, or a combination of these. Concessional loans typically have long grace periods.

7. Debt Securities:

A debt security is a debt instrument that can be bought or sold between two parties and has basic terms defined, such as the notional amount (the amount borrowed), interest rate, and maturity and renewal date. Examples of debt securities include a government bond, corporate bond, certificate of deposit (CD), municipal bond, or preferred stock. Debt securities can also come in the form of collateralized securities, such as collateralized debt obligations (CDOs), collateralized mortgage obligations (CMOs) and zero-coupon securities.

8. Debt Service:

The amount of money required to make payments on the principal and interest on outstanding loans, the interest on bonds or the principal of maturing bonds. Debt service payment or servicing of external debt is defined as the set of payments, inclusive of both principal and interest that are made to meet the debt obligation to non-resident creditors.

8.1 Principal:

The principal is a term that has several financial meanings. The most commonly used refers to the original sum of money borrowed in a loan or put into an investment. Similar to the former, it can also refer to the face value of a bond.

8.2 Interest:

Interest in finance and economics is payment from a borrower or deposit-taking financial institution to a lender or depositor of an amount above repayment of the principal sum (that is, the amount borrowed) at a particular rate. It is distinct from a fee which the borrower may pay the lender or some third party.

9. Currency and Deposits:

Currency and deposits are financial assets that are used to make payments or that may be included in money broadly defined consisting of currency, transferable deposits and other deposits. Currency consists of notes and coin that are in circulation and commonly use to make payments.

Deposits comprise both transferable and other deposits.

10. Trade Credit and Accounts Payable (Liabilities):

Trade Credits may arise due to direct extension of credit by buyers (non-residents) to the reporting enterprise for goods and services transactions. It also arises due to advance payments by non-residents to the reporting enterprise for "work that is in progress or to be undertaken". Trade Credit increases due to purchase (foreign) or import of goods (say, yarn, raw materials etc.) from non-residents and decreases when its value is paid. It is called accounts payable.

11. Trade Credit and Accounts Receivable (Claims):

Trade credits may arise due to direct extension of credit by suppliers (reporting enterprise) to non-residents for goods and services transactions. Trade credits increase due to export of goods to non-residents and decreases when its value is received. It is called accounts receivable.

12. External Debt to GDP Ratio:

The ratio of the external debt stock to GDP is derived by scaling the total outstanding debt stock (in Taka) at the end of the financial year by the GDP (in taka at current market prices) during the financial year.

CHAPTER -V

SECTION-IV

EXTERNAL DEBT: POLICY FRAMEWORK IN BANGLADESH:

Currently the external debt management process consists of 2(two) parts, one for public sector and the other for private sector. The public sector debt of central govt. and state owned enterprise management process is being dealt with by ERD while the private sector debt management is being dealt with by Bangladesh Bank.

1. Public Sector Debt: Public sector external debt consists of Central Govt., Central Bank and Nationalized Commercial Bank's borrowing from abroad. Economic Relations Division (ERD) of Ministry of Finance (MOF) manages the external debt of Central Govt. By agreement and State owned enterprises (SOE) by prior approval of Standing Committee on Non-concessional Loans.

2. Private Sector Debt: Borrowing from abroad by private sector enterprises in Bangladesh (including supplier's credit, financial loan and debt issue to capital market abroad) shall require prior authorization of Bangladesh Investment Development Authority (BIDA). Procedures in details for obtaining such credit facilities have been embodied in the notification no. BOI/R & IM1/4(39)/81 (part)/1209 issued on 10th December, 1998. Prior approval of the Bangladesh Bank is needed for medium and Long-term external borrowing by industrial enterprise in Export Processing Zones/ Economic Zones/Hi-teck Park. The private sector external debt management may refer to a high powered committee titled the Scrutiny Committee, the highest authority of the government to approve foreign borrowing proposals in private sector. The existing Scrutiny Committee consists of the following members:

• Convener: Governor, Bangladesh Bank

• Member :Executive Chairman, BIDA

• Member : Representative from Ministry of Finance

CHAPTER –V SECTION-V Data Dissemination

1. Valuation Principles

- a) Data have been valued using the concept of the "own funds at book value (OFBV)" for equity capital.
- b) Market values should be used to value debt securities.
- c) Face (par) value should be used to value debt instruments.
- **2. Authority:** Article 69 of the Bangladesh Bank Order, 1972 (President's Order No. 127 of 1972) authorizes Bangladesh Bank to request from natural or juridical persons including the government, such data or information as are required for proper execution of its responsibilities.
- **3. Data Confidentiality:** Bangladesh Bank respects the right to privacy and confidentiality of the respondents and likes to mention that, under no circumstances will any individual statement or data be published or made known to any other individual or corporate body without express written permission of the respondent concerned. Aggregated data, when published, will naturally conceal individual identity.

4. Dissemination of FDI Statistics in Bangladesh:

- i) **Bangladesh Bank**, Statistics Department has been publishing a booklet named "Foreign Direct Investment in Bangladesh" on half yearly basis since 2008. Also updated data on Foreign Direct Investment and External Debt uploaded periodically at Bangladesh Bank website (<u>bb.org.bd</u>) on quarterly basis. From fiscal year we are going to publish new booklet named "Foreign Investment and External Sector Debt". The coverage of foreign direct investment, portfolio investment, outward foreign investment of Bangladesh and external debt statistics have been expanded over the years to align it with the international practices and make it more comprehensive.
- ii) Bangladesh has also been disseminating data on Foreign Investment under IMF's Coordinated Direct Investment (CDIS) & UNCTAD's World Investment Report and external debt under IMF's General Data Dissemination Standards (GDDS) and Quarterly External Debt Statistics (QEDS) database of the World Bank in collaboration with the IMF according to the guides of 2013 External Debt Statistics: Guide for Compilers Users and Sixth Edition of Balance of Payments and International Investment Position Manual (BPM6). Statistics Department also disseminates under IMF's Coordinated Portfolio Investment Survey (CPIS).
- iii) Bangladesh Bank provides FDI, External debt and Portfolio Investment data to BIDA, BEPZA, BEZA, different ministries, different embassies and other government & nongovernment organizations on regular basis.
