Recent Measures Taken by Bangladesh Bank to Facilitate Rural Financing

- Bangladesh Bank declared the Agricultural and Rural Credit Policy and Program for FY18. All scheduled banks and the BRDB were advised to follow and implement the policy and program and inform it to the Agricultural Credit Department of Bangladesh Bank (Ref: ACD Circular No. 02; 27 July 2017).
- According to the ACD Circular No. 02; 31 July, 2016, the commercial banks having Agent Banking activities and are willing to start, will be able to participate in the agricultural and rural credit disbursement program through Agent Banking operations alongside the ongoing agricultural credit disbursement. The main features of the circular are as follows;
 - All banks including Agent Banks have to disburse 60.0% of annual agriculture and rural credit target in the crop sector.
 - Declining rate of interest may be applied in realization of loan installments.
 - Banks will impose maximum 0.50% commission/service charge (including VAT) from the borrowers in addition to the stipulated interest rate and no other commissions/fees will be charged. Bank will credit this commission/service charge directly to the agents account and agent will not be allowed to collect any commission/service charge from the borrowers.
- According to ACD circular no. 03, 18 August, 2016, an amendment has been made to section 8 (B) of ACD circular no. 02, 2 June, 2015. Scheduled banks are instructed not to realize any subsidiary deposit from the said borrowers. All other conditions of ACD circular no. 02, 2 June, 2015 and ACD circular no. 03, 25 August, 2015 will remain unchanged.
- According to the ACD Circular No. 03; 22 October, 2017, Bangladesh Bank declared an integrated agriculture credit policy after modification and extension of all other previous circulars, relating to setting up agriculture credit target and achievement by the Private Commercial Banks and Foreign Commercial Banks. The main features of the circular are as follows:
 - All banks have to set up a rational agriculture credit target, which must be not less than 2.5% of net credit and advances as on 31 March of the preceding fiscal year. But the target for FY18 will remain unchanged.
 - If a bank is not able to achieve agriculture and rural credit target at the end of the fiscal year, it has to deposit the equivalent amount of unachieved target at Bangladesh Bank. Bangladesh Bank will not give interest on the deposited money. If a bank can disburse unachieved agriculture credit of previous years in whole or partly along with the following fiscal year's target, the deposit amount of money will be refunded in whole or proportionately.
 - As an alternative remedial measure of the preceding section, a bank can deposit 3% of unachieved credit at Bangladesh Bank. If the bank can disburse the unachieved credit of

the previous year in whole or partly along with the following two fiscal years' target, the deposited amount will be refunded in whole or proportionately. Otherwise, the deposited amount will not be refunded.

- If a bank's credit disbursement turns higher than the amount determined on the basis of net loan and advances of 31 March of the preceding fiscal year, this remedial measure will not apply.
- Statements relating to remedial measures submitted by banks to BB will be verified.

Bangladesh Bank is providing policy directions to promote inclusive economic growth and to expedite credit flow to all sub-sectors in agriculture and non-farm activities. Agriculture sector has experienced a steady rise in crop production over the years as high attention has been given to the sector. Non-crop sectors like fisheries and livestock & poultry farm are also gaining momentum. However, during FY18, it is observed that agricultural credit disbursement in all sub-sectors like crops, irrigation equipments, live-stock & poultry farms, fisheries and agri-equipments were higher than the same period of the previous year. Agricultural production must be boosted up by raising productivity through channeling more credit as well as encourage to use latest technology in both crop and non-crop sectors which is also necessary to enhance sustainable growth of the sector.
