It is defined as the balances in trade, services, income and current transfer accounts in the BOP. This definition is in accordance with the 6th edition of the BOP Manual issued by the IMF.

## **8. Revised Interest/Profit Rate Policy on Deposits and Lending**

Under the financial sector reform programs, a new system of interest rate determination was established with deposit & lending rates that better reflects market conditions. The main objective of the new interest rate policy is to introduce flexibility into the deposit rates permitting individual banks to establish their own rates fixed by themselves. Banks are now free to adjust their own rates effective from February 19, 1997. Furthermore, flexibility in the interest rate policy introduced from July 12, 1999 permits banks to differentiate interest rates among individual borrowers except for lending to exporters only. For other sectors, lending rates would be decided by the banks themselves.

Due to high interest/profit rate, cost of doing business escalates and industry loses its competitiveness, as a result borrowers may fail to repay loans, which disrupts discipline in banking credit system and obstructs economic growth of the country. In this context, to increase competitiveness locally and internationally for business, industries and service institutions, for creating Industry and business friendly environment, to increase ability of repayment of debt/investment and fostering economic growth, Bangladesh Bank made a circular to all operating commercial banks.

According to BRPD circular no-03/2020, the lending rate for all unclassified loans and investments except credit cards would be maximum of 9% with effect from April 01, 2020.

Apart from the conventional deposit and lending rates, the Islamic banks in Bangladesh have been carrying on their banking transactions in line with the Islamic Shariah systems of interest-free policy. Under this policy, investment-income of the bank is shared with the mudaraba depositors according to a pre-agreed profit sharing ratio to ensure a reasonably fair rate of return on their deposits which is shown in Table- XIV.

To maintain overall progress of the economy along with industry and business and to ensure effective loan management, Bangladesh Bank introduced a market base interest rate policy called “SMART” (Six-Month Moving Average Rate of Treasury Bills) through a circular no. 09/2023 dated June 19, 2023. According to the circular Bangladesh Bank will determine a reference rate on the basis of interest rate of Treasury Bill (182 days) and publish as SMART index at the 1st day of each month on Bangladesh Bank website. The Scheduled Banks have to apply this SMART rate in all their loan disbursement adding a margin with the loan products mentioned in the circular. The circular is effective from July 01, 2023.
