## Developments of Islamic Banking Industry in Bangladesh during January-March 2016

The innovation of interest-free Islamic banking systems, proved its worth in the country's money market which continued to show strong growth since its inception in 1983 in tandem with the growth in the economy, as reflected by the increased market share as well as in mobilizing deposits and financing key sectors of the economy in Bangladesh. This report gives an overview of the Islamic Banking Industry regarding the developments taking place during the January-March 2016 quarter. As at the end of March 2016, 8 full-fledged Islamic banks are operating with 966 branches out of total 9410 branches of the banking industry; in addition, 21 Islamic banking branches of 9 conventional commercial banks and 25 Islamic banking windows of 7 conventional commercial banks are also providing Islamic financial services in Bangladesh. At the end of January-March 2016 quarter, deposits and investments of Islamic banking industry grew by 1.80% and 4.33% respectively while the surplus of liquidity declined by 27.08% compared to the previous quarter. Islamic Banking Industry accounted for more than one-fifth share of the entire banking industry in terms of deposits and investments at the end of the quarter under review.

### *Highlights on Islamic Banking Sector in Bangladesh, January-March 2016*

- ✓ **Total Deposits** in Islamic banking industry reached at Tk. 166027.71 crores at the end of January-March 2016 quarter, which increased by Tk. 2932.47 crores or by 1.80% compared to previous quarter and by Tk. 19293.35 crores or by 13.15% compared to corresponding quarter of the last year.
- ✓ **Total Investments** (Loans in conventional sense) in Islamic banking sector stood at Tk. 149402.33 crores at the end of January-March 2016 quarter, which went up by Tk. 6201.87 crores or by 4.33% and by Tk. 22692.99 crores or by 17.91% compared to previous quarter and same quarter of the preceding year respectively.

## Liquidity Situation

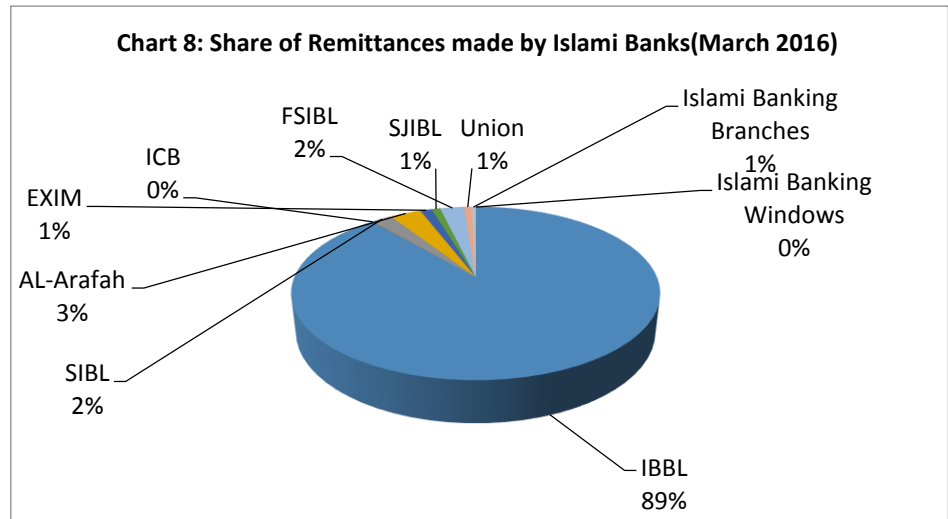

At the end of the quarter January-March 2016, surplus liquidity in the Islamic banking sector stood at Tk.9563.70 crores which was lower by Tk.3552.10 crores or by 27.08% and Tk. 2444.85 crores or by 20.36% than the last quarter and the same quarter of the previous year respectively. The surplus liquidity of 8 Islamic banks, Islamic banking branches of conventional banks and Islamic windows of 7 conventional banks stood at Tk. 8396.03 crores, Tk. 795.36

crores and Tk. 372.31 crores respectively. Actually Islamic banks in Bangladesh have been facing excess liquidity problem since long as they could not invest in Government Treasury Bills and Bonds because of the very interest bearing nature of those monetary instruments. For this, the amount of surplus liquidity of most of the Islamic banks is increasing day by day which have been affecting their net profit and increasing the cost of fund. The share of total excess liquidity of Islamic banks accounted for 8.02% among all banks during the period under review. Summary of liquidity situation in the Islamic Banking sector is shown in chart 6.

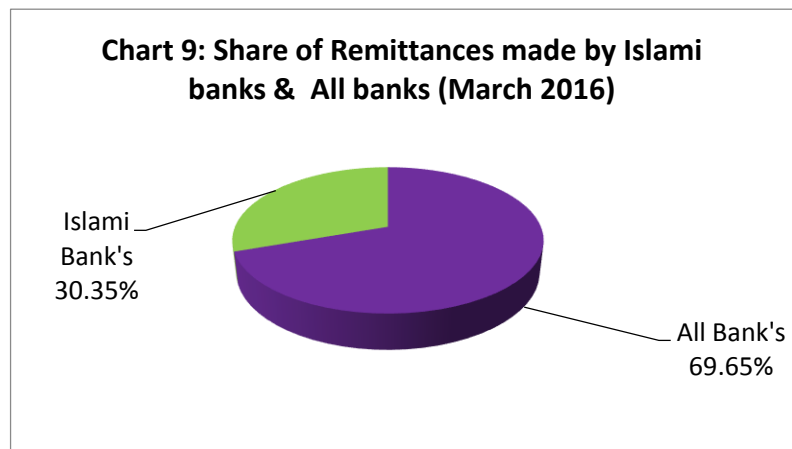

**Remittances Mobilized by the Islamic Banking Sector**

Islamic Banking Industry is playing a vital role in collecting foreign remittances and disbursing the same transferring among beneficiaries across the country. During January-March 2016 amount of remittances reached at Tk.8510.30 crores which was lower by Tk. 1268.61 crores or by 12.97% and Tk. 155.72 crores or by 1.80% than the previous quarter and the corresponding quarter of the last year respectively. Among the

Islamic banks, Islami Bank Bangladesh Ltd. occupied the top position (88.70%) in respect of remittance collection at the end of March 2016. The shares of remittance of other Islamic banks included Al Arafah Islami Bank Ltd. (3.26%), First Security Islami Bank Ltd (2.51%), Social Islami Bank Ltd (2.12%), EXIM Bank Ltd. (1.21%), Shahjalal Islami Bank (0.90%), Union Bank Ltd (0.72%) and Islamic banking branches(0.51%).

The Islamic Banking Industry accounted for 30.35% share of remittances collected by the entire banking industry at the end of the quarter under review. Remittance collections of all scheduled banks, all Islamic banks and Islamic banking branches/windows of conventional banks are provided in chart-9.

## Expansion of Branches

The number of Islamic Banking branches (including Islamic branches of conventional banks and windows) stood at 1012 at the end of the quarter under review which was 1009 at the end of the previous quarter and was 934 at the end of the preceding quarter of March 2015. At the end of January-March 2016 quarter, among the Islamic Banking Industry, 8 full-fledged Islamic banks had 966 branches, 9 conventional commercial banks had 21 and 7 conventional banks had 25 windows. The share of total bank branches of Islami banks among all scheduled banks accounted for 10.75% at the end of the quarter under review. Information on branches of Islamic banks is shown in Table-4.

## **Corporate Social Responsibility**

Islamic banks undertake and implement various types of social programs under Corporate Social Responsibility (CSR) activities. Sources of funds of Islamic banks available for CSR activities include Zakat, compensation charges (penal charges from defaulting investment clients) and Sharia'h-permitted other sources of earnings. These funds are spent among different types of education, training, health and charity-based organizations in Bangladesh. Islamic banks serve the deprived and disadvantaged segments of people, who, because of extreme poverty, remain outside the purview of the conventional banking system; the banks make financial transactions based on human necessities and embark upon productivity-oriented projects or activities to reduce the incidence of poverty. Expenditure on CSR activities decreased by 48.42% in this quarter compared to the previous quarter. At the end of January-March 2016 quarter, total expenditure on CSR activities of Islamic Banking Industry stood at Tk.33.53 crores which was Tk. 65.01 crores during the previous quarter.

## **Events Organized by the Islamic banks during the quarter**

Islamic banks' Sharia'h Supervisory Boards have inspected 156 branches and 12 meetings held during the quarter January-March 2016. Total number of publications published by the Islamic banks are 11 including Islami Bank Bangladesh Ltd. 6 (Books: Makasidee Sharihar Alope Islamic banking-2016 , In house magazine: Polli Unnaayon Barta: January 2016, Brochure: Bicolpo Banking Seba Students Mudaraba Savings Account, Hajj Sanchay Prokalpo and Nari Udyokta Biniog Prokalpo SME Biniog) followed by First Security Islami Bank Ltd. 4 and EXIM Bank Ltd. 1 (Journal: EXIM Parikroma) during the quarter under review. Besides, Islamic banks have organized 59 seminar/workshop/conference and 62 training course in home and the participants of foreign training course is 9 in number for boost up the Sharia'h based knowledge of its employees during January-March 2016quarter.

## **Concluding Remarks and Recommendations**

The idea of Islamic banking took as many as thirty years for its conceptual consolidation and only by the early seventies did it take the shape of the present day comprehensive model. Since, the banking services are needed but interest is prohibited, Islamic economies have to find alternative ways of performing various banking functions which provides the rationale of Islamic banking.

The Islamic banking sector of Bangladesh, due to popular support and market demand continued to grow at a rapid pace which is reflected by the increasing branch network of Islamic Banking Institutions. Islamic Banking Industry in Bangladesh has been highly contributing to spur economic growth and generate employment in the country to fulfill the vision of the government to reach the country at a Middle Income Level by the year 2021. Thereby, this banking industry with more than 20% market share and 28543 employees have been playing a very dominant role in mobilizing deposits and financing in the real sector industries, services and other key sectors of the economy and collecting about a one-third portion of total foreign remittances in Bangladesh.

During the quarter under review it is observed that, total investment of Islamic banking industry increased significantly while their total profit and total surplus liquidity decreased compared to the

previous quarter. Total investment increased this quarter mainly in the sector like Industry, MSME (Micro, Small and Medium Enterprises), Real Estate and Trade & Business sector through the operational mechanism of different modes like Mudaraba, Musharaka, Bai-Murabaha, Bai-Muajjal, Bai-Salam and HPSM (Hire Purchase under Sirkatul Melk). Despite the continuous growth of Islamic banking in the country, a large portion of the population remains unbanked, thus the full potential of the budding industry has not only to be unlocked yet but also the numbers of rural branches of full-fledged Islamic banks have not increased as per expectation, and the activities of Islamic banking branches/windows of conventional banks as well are also not being expanded to the reach of the rural people. Besides, since SME financing is given highest importance as an important engine of economic growth and as a potential sector of investment in banking industry, most of the full-fledged Islamic banks have not yet fully utilized the refinance facilities extended by the Bangladesh Bank. Their branch activities should be redesigned as per Bangladesh Bank guidelines on sustainable green finance.

Role of the Islamic Banking industry, as a whole, in respect of Islamic Microfinance is not prominent. Since the core objectives of Islamic banking industry is to fulfill the Maqasid-al-Sharia'h i.e. to help expedite the financial inclusion drives with Islamic financial literacy programs to associate the poor and disadvantaged people of the country in small types of income generating activities so that they can get a space to live as a respectable human being. As the bulk of the investments made by Islamic banks has been concentrated in trade and rent-related sectors, they should invest more in socially desirable and sustainable real sectors especially in micro, share-cropping, non-traditional agriculture and small enterprises.

Islamic banking has been thriving in the vibrantly growing Bangladesh economy with avid participation of the Islamic banks in the financial inclusion campaign. As sharia'h is the backbone of the Islamic banking industry, a comprehensive Islamic legal infrastructure with clear ground and commitment is necessary to help expedite Islamic financial industry to spur as it intended for ensuring human welfare.

Islamic banking sector of the country may conduct some empirical research and surveys to redesign their investment policies because the investments made by these banks in true modes like Mudaraba and Musharaka are at a minimal level (only 10.5% of total investments). They should pay more attention in R & D to devising the proper guidelines and policies to promoting investments under Mudaraba and Musharaka modes. Furthermore, to strengthening the knowledge-base of manpower they should also introduce cutting-edge leadership development training programs combining with Sharia'h, finance and economics as well as on emerging country economic and financial issues in their training institutes. They may also consider to have cross-border experiences of Islamic banking to enrich their knowledge and experiences through arranging seminar and conferences on regular basis. Lastly, from the stability point of view, Islamic banks are less vulnerable in terms of risks than conventional banks as they are quite able to adjust the negative financial shocks due mainly to the beauty of rules of the Islamic financial contracts. Besides, the fast and stable growth of Islamic banks in the world financial system during the last few decades indicate the inherent strength of Islamic banking as a challenging alternative to the interest based capitalistic financial system. Actually, the Sharia'h based activities of the Islamic banks and reliable commitment to the client encourage the Muslims to be attracted by the Islamic banking services which increased the activities of Islamic banking industry in the countrywide.
